

## BLADEX'S FIRST QUARTER NET INCOME INCREASES 98% Y-O-Y TO \$32.2 MILLION, OR \$0.86 PER SHARE; ROE RISES TO 16.6%

PANAMA CITY, April 18, 2012 – Banco Latinoamericano de Comercio Exterior, S.A. (NYSE: BLX, “Bladex”, or “the Bank”) announced today results for the first quarter ended March 31, 2012.

### First quarter 2012 Business Highlights

- Bladex's first quarter 2012 Net Income<sup>(1)</sup> totaled \$32.2 million, a \$15.9 million, or 98%, improvement from first quarter 2011, driven by strong increases in Net Income within the Commercial (+\$15.3 million, +147%) and Treasury Divisions (+\$2.6 million, +108%), while the Asset Management Unit contributed \$1.5 million to the Bank's quarterly result. The \$7.4 million, or 30%, increase in Net Income compared to fourth quarter 2011 was mainly the result of improved performances in the Commercial (+\$8.0 million, +45%), and Treasury Divisions (+\$1.7 million, +52%).

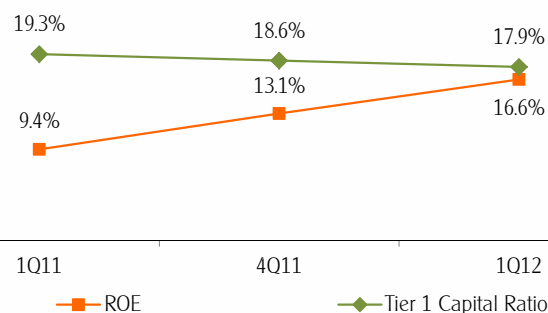

Quarterly Net Income by Division  
(In US\$ million)

- Increased Net Income resulted in a 16.6% annualized return on the Bank's average stockholders' equity ("ROE") in first quarter 2012, compared to 9.4% in first quarter 2011, and 13.1% in the previous quarter, while the Bank's Tier 1 capital ratio remained strong at 17.9%, compared to 19.3% as of March 31, 2011, and 18.6% as of December 31, 2011. The Bank's equity consists entirely of issued and fully paid ordinary common stock.

<sup>(1)</sup> Net income or loss attributable to Bladex ("Net Income", or "Net Loss").

ROE and Tier 1 Capital Ratio Evolution

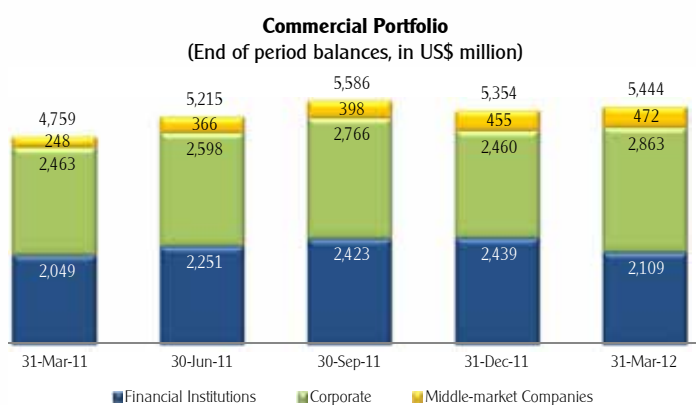

- Net interest income totaled \$29.6 million in first quarter 2012, compared to \$21.4 million in first quarter 2011, and \$29.1 million in fourth quarter 2011. The \$8.2 million, or 38%, increase from a year ago was mainly attributable to improved net interest margins (+18 bps), and higher average interest-earning asset balances (+24%).

Quarterly Net Interest Income & Margins  
(In US\$ million)

- As of March 31, 2012, the Commercial Portfolio totaled \$5.4 billion, a \$0.7 billion, or 14%, year-on-year increase, and a 2% increase from the previous quarter. The annual increase was mainly attributable to the Division's portfolio growth and diversification from the Bank's established client base of corporations (+16%), along with the continuing business expansion into the middle-market segment (+90%), which now accounts for 9% of the Commercial Portfolio. During first quarter 2012, credit disbursements amounted to \$2.5 billion, a 12% increase compared to the same period in 2011, and 11% higher than in the fourth quarter 2011.

- As part of the Bank's strategy to diversify funding sources, and to gradually extend funding tenors, short-term borrowings and securities sold under repurchase agreements ("Repos") decreased 15% year-on-year, and 30% quarter-on-quarter to reach \$1.2 billion at the end of the first quarter 2012, while borrowings and long-term debt reached \$1.6 billion, up 31% year-on-year, and 5% increase from the previous quarter. During March 2012, the Bank successfully completed its first \$156 million bond issuance in the Mexican capital markets, and placed a \$400 million bond issuance under its global Euro Medium-Term Notes ("EMTN") Program. As of March 31, 2012, deposit balances were \$2.4 billion, a 25% year-on-year increase, and a 4% increase compared to the previous quarter.

- The non-accrual portfolio balances totaled \$24.0 million as of March 31, 2012, representing 0.5% of the loan portfolio, compared to \$29.0 million, or 0.7% of the loan portfolio, as of March 31, 2011, and \$32.0 million, or 0.6% of the loan portfolio, in the previous quarter. During the quarter, a shift in Commercial Portfolio balances towards lower risk transactions led to the need for lower generic provisions for credit losses. Credit provision levels as of these dates represented 363%, 318%, and 304% of non-accrual balances, respectively.
- The Bank's first quarter 2012 efficiency ratio improved to 31%, compared to 40% in the first quarter 2011, and 34% in the fourth quarter 2011, mainly as a result of increased operating revenues from the Commercial and Treasury Divisions.

## CEO's Comments

Mr. Jaime Rivera, Bladex's Chief Executive Officer, stated the following regarding the Bank's results: "Bladex's solid first quarter results, achieved in the midst of difficult times for the global economy and the financial industry, are particularly noteworthy. As Bladex continued to project the Bank's strong market position and expanding franchise onto trade finance, a growing business in which Bladex has distinct expertise and possesses significant competitive advantages, while pursuing business in a growing Region that we know like few others, Bladex's financial results continued to strengthen.

Improvements were noticeable across a great majority of fundamentals that drive Bladex's business: interest revenue, net interest margins, securities activities, portfolio quality and asset management. Very importantly as well, the liability side of the balance sheet was strengthened, such that maturity gaps and currency positions at the Bank are now nearly immaterial, protecting the Bank's funding base in all but the direst of market conditions. Only commission income failed to meet expectations. However, the Bank is working on several transactions in the pipeline that it believes will close the gap in coming quarters.

The combined effects of these fundamentals resulted in a \$32.2 million profit in the first quarter. The implied ROE of 16.6% demonstrated the ability of Bladex's business model to deliver high levels of profitability, while maintaining strong levels of capitalization and liquidity.

Bladex knows its business extremely well, measures and manages risks effectively, maintains a steady hand during market disruptions, runs a lean structure, and executes in a disciplined manner to a very high level of excellence. During the remainder of 2012, Bladex will continue to operate on these principles, which have allowed the Bank to increase Net Income in the core business by nearly 70% in two years.

Given global uncertainties in the market, Bladex understands that the road forward will not be easy, smooth, nor steady, something that the Bank actually views as an advantage, as this environment drives less committed competitors away. Nevertheless, Bladex remains confident that by continuing to provide a larger array of trade finance services to an expanding client base across an increasing number of markets, the Bank will continue to strengthen financial results, while fulfilling its mission as a key element of Latin America's trade structure and creating value for shareholders."

## RESULTS BY BUSINESS SEGMENT

### COMMERCIAL DIVISION

The Commercial Division incorporates the Bank's core business of financial intermediation and fee generation activities. Net Income includes net interest income from loans, fee income, allocated operating expenses, reversals or provisions for loan and off-balance sheet credit losses, and any impairment on assets.

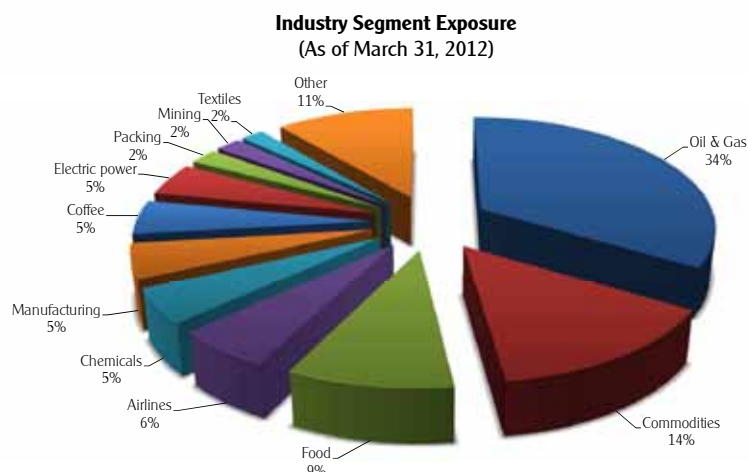

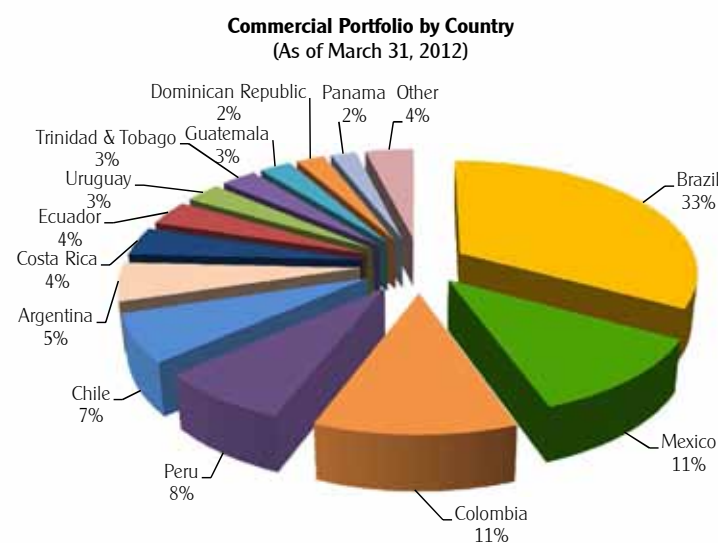

The Commercial Portfolio includes the book value of loans, selected deposits placed, equity investments, acceptances, and contingencies (including letters of credit, stand-by letters of credit, and guarantees covering commercial risk and credit commitments).

As of March 31, 2012, the Commercial Division portfolio balances totaled \$5.4 billion, a 2% increase from the previous quarter, and a 14% increase from first quarter 2011. The annual increase was mainly attributable to the Division's portfolio growth and diversification from the Bank's established client base of corporations (+16%) and financial institutions (+3%), along with the continuing business expansion into the middle-market segment (+90%).

The Commercial Portfolio continued to be short-term and trade-related in nature: \$4.1 billion, or 75%, of the Commercial Portfolio matures within one year, and \$2.2 billion, or 41%, within 90 days. Trade financing operations represented 61% of the portfolio, while the remaining balance consisted primarily of lending to banks and corporations involved in foreign trade.

The following graphs illustrate the geographic composition of the Bank's Commercial Division by country of risk, with exposures in Brazil gradually declining in relative terms in favor of other countries, especially Mexico, and the diversification of corporate and middle-market companies across a variety of industry segments:

During the first quarter 2012, credit disbursements totaled \$2.5 billion, 11% more than fourth quarter 2011, and a 12% increase compared to the same period in the previous year, even as disbursements in Brazil were punctually affected by the introduction of new foreign exchange regulations during the quarter.

Refer to Exhibit VIII for additional information relating to the Bank's Commercial Portfolio distribution by country, and Exhibit X for the Bank's distribution of credit disbursements by country.

### 1Q12 vs. 4Q11

The Commercial Division's first quarter 2012 Net Income totaled \$25.7 million, compared to \$17.7 million in fourth quarter 2011. The \$8.0 million, or 45%, increase in Net Income was mainly driven by (i) a \$2.2 million increase in net interest income from higher lending rates (+37 bps), and (ii) a \$5.6 million positive variation in reversals (provisions) for credit losses, due to a shift in the portfolio towards lower risk transactions.

### 1Q12 vs. 1Q11

Net Income more than doubled to \$25.7 million compared to \$10.4 million in first quarter 2011. The \$15.3 million, or 147%,

increase, was the result of the combined effects of: (i) a \$10.4 million, or 63% increase in net interest income as a result of higher average loan portfolio balances (+20%) and improved net interest margins (+18 bps), (ii) a \$4.7 million positive variation in reversals (provisions) for credit losses, due to the improved risk profile of the Commercial Portfolio, (iii) a \$0.8 million, or 36%, increase in fee and other income, and (iv) a \$0.6 million, or 8%, increase in operating expenses, as the result of the Division's expanded sales force and local presence in the Region.

## **TREASURY DIVISION**

The Treasury Division incorporates the Bank's liquidity management, and investment securities activities. Net Income is presented net of allocated operating expenses, and includes net interest income on Treasury activities and net other income (loss) relating to Treasury activities.

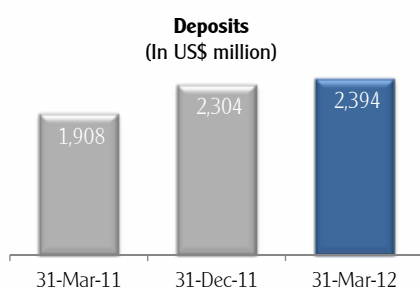

Liquid assets <sup>(8)</sup> amounted to \$525 million as of March 31, 2012, compared to \$786 million as of December 31, 2011, and \$322 million as of March 31, 2011, as the Bank maintained a conservative and proactive liquidity management approach. The liquid assets to total assets ratio was 8.7%, compared to 12.4% as of December 31, 2011, and 6.1% as of March 31, 2011.

As of March 31, 2012, the securities available-for-sale portfolio totaled \$248 million, compared to \$416 million as of December 31, 2011, and \$387 million as of March 31, 2011, as positions in securities held available-for-sale were reduced for gains during

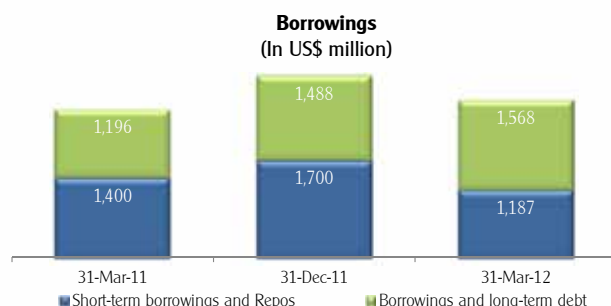

the quarter. As of March 31, 2012, the available-for-sale portfolio consisted of readily quoted Latin American securities, 68% of which were sovereign or state-owned risk in nature (refer to Exhibit IX for a per country distribution of the Treasury portfolio).

The available-for-sale portfolio is marked-to-market, with the impact recorded in stockholders' equity through the Other Comprehensive Income (Loss) Account ("OCI"), which improved to (\$0.1) million in the first quarter 2012, compared to (\$3.1) million in the fourth quarter 2011, and (\$3.8) million in the first quarter 2011, mainly as the net result of improved valuations of the underlying securities and/or the interest rate hedging instruments associated with them.

As of March 31, 2012, deposit balances amounted to \$2.4 billion, a 4% increase compared to the previous quarter, and a 25% year-on-year increase. Deposits originated mostly from central banks, financial institutions and corporations throughout Latin America, and represented 46% of total liabilities at the end of first quarter 2012.

As part of the Bank's strategy to diversify funding sources, and to gradually extend funding tenors, short-term borrowings and securities sold under repurchase agreements ("Repos") decreased 15% year-on-year, and 30% quarter-on-quarter to reach \$1.2 billion at the end of first quarter 2012, while borrowings and long-term debt reached \$1.6 billion, up 31% year-on-year, and 5% from the previous quarter. During March 2012, the Bank successfully completed its first \$156 million bond issuance in the Mexican capital markets, and placed a \$400 million bond issuance under its global EMTN Program.

### 1Q12 vs. 4Q11

In first quarter 2012, the Division reported Net Income of \$5.0 million, compared to Net Income of \$3.3 million in fourth quarter 2011. The \$1.7 million, or 52%, increase, was primarily the result of a \$4.0 million increase in non-interest operating income mainly associated with higher gains on sale of securities available for sale, partially offset by a \$1.9 million decrease in net interest income, mainly attributable to lower interest-earning securities portfolio balances, and higher interest expense resulting from a 16 bps increase in funding costs as average funding tenors expanded.

### 1Q12 vs. 1Q11

The Division's quarterly Net Income more than doubled to \$5.0 million, compared to first quarter 2011. The \$2.6 million increase was due to the combined effects of: (i) a \$5.7 million increase in non-interest operating income primarily as a result of higher gains on sale of securities available for sale, (ii) a \$2.4 million decrease in net interest income mainly attributable to higher interest expense as a result of a 29 bps increase in funding costs mainly as a result of increased short-term borrowing costs and higher average borrowing balances, and (iii) a \$0.7 million increase in operating expenses.

## ASSET MANAGEMENT UNIT

The Asset Management Unit incorporates the Bank's asset management activities. The Unit's Investment Funds primarily follow a Latin America macro strategy, utilizing a combination of products (foreign exchange, equity indices, interest rate swaps, and sovereign credit products) to establish long and short positions in the markets.

The Unit's Net Income of \$1.5 million in first quarter 2012 represented a \$2.0 million decrease from the \$3.5 million in Net Income reported in first quarter 2011, mainly attributable to lower gains from investments in the Investment Funds, along with higher operating expenses.

As of March 31, 2012, the Investment Fund's asset value totaled \$122 million, compared to \$120 million as of December 31, 2011, and \$161 million as of March 31, 2011. As of the same dates, Bladex's ownership of the Bladex Offshore Feeder Fund was

The \$10.2 million quarter-on-quarter net decrease in the total allowance for credit losses was mostly driven by a \$5.8 million loan charge-off against specific reserves created in prior periods, and \$4.4 million in reversals for credit losses as a result of a shift in the mix of both loan and off-balance sheet exposures to lower client and country risk profiles. The \$5.0 million year-on-year decrease in the total allowance for credit losses was mainly attributable to \$4.8 million in loan charge-offs, net of recoveries. The ratio of the

allowance for credit losses to the Commercial Portfolio was 1.6% as of March 31, 2012, compared to 1.8% as of December 31, 2011, and 1.9% as of March 31, 2011.

The Bank's first quarter 2012 efficiency ratio improved to 31%, compared to 34% in the fourth quarter 2011, and 40% in first quarter 2011, mainly as a result of increased operating revenues from the Commercial and Treasury Divisions.
