During the first six months of 2011, net interest income amounted to \$44.9 million, an increase of \$11.4 million, or 34%, compared to \$33.5 million in the same period 2010, mainly as a result of higher average interest-earning assets balances.

CEO's Comments

Mr. Jaime Rivera, Bladex's Chief Executive Officer, stated the following regarding the Bank's results: "I view the second quarter's results as a confirmation of the favorable trends underlying our business and the soundness of our strategy.

Among many other indicators of our solid performance, the 10% commercial portfolio growth reflects our expanding franchise and the continued strength and competitiveness of Latin America's trade flows. The record level of central bank deposits confirms the support and close relationship we maintain with our government shareholders. Improving intermediation margins reflect our pricing power as a strategic partner to our clients.

In spite of our gradual reduction of exposure to the Fund that we had announced, our Asset Management Unit posted one of its best quarters in 4 years.

The combination of these factors resulted in the Bank achieving an ROE of 14.3%, while maintaining a strong 18.1% Tier 1 capital ratio and improving credit quality even further.

While we are satisfied with the quarter's results, we are particularly encouraged about what they say about the Bank's ability to continue to increase its profitability in a prudent, sound, and stable manner." Mr. Rivera concluded.
