The accompanying notes are an integral part of these unaudited condensed consolidated interim financial statements.

1. Corporate information

Banco Latinoamericano de Comercio Exterior, S. A. (“Bladex Head Office” and together with its subsidiaries “Bladex” or the “Bank”), headquartered in Panama City, Republic of Panama, is a specialized multinational bank established to support the financing of foreign trade and economic integration in Latin America and the Caribbean (the “Region”). The Bank was established pursuant to a May 1975 proposal presented to the Assembly of Governors of Central Banks in the Region, which recommended the creation of a multinational organization to increase the foreign trade financing capacity of the Region. The Bank was organized in 1977, incorporated in 1978 as a corporation pursuant to the laws of the Republic of Panama, and initiated operations on January 2, 1979. Under a contract law signed in 1978 between the Republic of Panama and Bladex, the Bank was granted certain privileges by the Republic of Panama, including an exemption from payment of income taxes in Panama.

The Bank operates under a general banking license issued by the National Banking Commission of Panama, predecessor of the Superintendence of Banks of Panama (the “SBP”).

In the Republic of Panama, banks are regulated by the SBP through Executive Decree No. 52 of April 30, 2008, which adopts the unique text of Law Decree No. 9 of February 26, 1998, modified by Law Decree No. 2 of February 22, 2008. Banks are also regulated by resolutions and agreements issued by this entity. The main aspects of this law and its regulations include: the authorization of banking licenses, minimum capital and liquidity requirements, consolidated supervision, procedures for management of credit, liquidity and market risks, measures to prevent money laundering, the financing of terrorism and related illicit activities, and procedures for banking intervention and liquidation, among others.

Bladex Head Office’s subsidiaries are the following:

- Bladex Holdings Inc. is a wholly owned subsidiary, incorporated under the laws of the State of Delaware, United States of America (USA), on May 30, 2000. Bladex Holdings Inc. has ownership in Bladex Representação Ltda.
- Bladex Representação Ltda. incorporated under the laws of Brazil on January 7, 2000, acts as the Bank’s representative office in Brazil. Bladex Representação Ltda. is 99.999% owned by Bladex Head Office and the remaining 0.001% is owned by Bladex Holdings Inc.
- Bladex Development Corp. was incorporated under the laws of the Republic of Panama on June 5, 2014. Bladex Development Corp. is 100% owned by Bladex Head Office.
- BLX Soluciones, S.A. de C.V., SOFOM, E.N.R. (“BLX Soluciones”) was incorporated under the laws of Mexico on June 13, 2014. BLX Soluciones is 99.9% owned by Bladex Head Office, and Bladex Development Corp. owns the remaining 0.1%. The company specializes in offering financial leasing and other financial products such as loans and factoring.

Bladex Head Office has an agency in New York City, USA (the “New York Agency”), which began operations on March 27, 1989. The New York Agency is principally engaged in financing transactions related to international trade, mostly the confirmation and financing of letters of credit for customers in the Region. The New York Agency also has authorization to book transactions through an International Banking Facility (“IBF”).

The Bank has representative offices in Buenos Aires, Argentina; in Mexico City, Mexico; and in Bogota, Colombia, and has a representative license in Lima, Peru.

These unaudited condensed consolidated interim financial statements were authorized for issue by the Board of Directors on July 21, 2020.

2. Basis of preparation of the condensed consolidated interim financial statements

2.1 Statement of compliance

These condensed consolidated interim financial statements of Banco Latinoamericano de Comercio Exterior, S. A. and its subsidiaries have been prepared in accordance with International Accounting Standard 34 Interim Financial Reporting (IAS 34) issued by the International Accounting Standards Board ("IASB"). As all the disclosures required by IFRS for annual period consolidated financial statements are not included herein, these condensed consolidated interim financial statements should be read in conjunction with the audited consolidated financial statements and the notes thereto as of and for the year ended December 31, 2019, contained in the Bank's annual audited consolidated financial statements. The condensed consolidated interim statements of profit or loss, other comprehensive income, changes in equity and cash flows for the periods presented are not necessarily indicative of results expected for any future period.

3. Changes in significant accounting policies

3.1 New accounting policies and amendments adopted

The Bank has initially adopted Interest Rate Benchmark Reform (Amendments to IFRS 9, and IFRS 7) from January 1, 2020. This change in accounting policy is also expected to be reflected in the Bank's consolidated financial statements as at and for the year ending December 31, 2020. The Bank has applied the interest rate benchmark reform amendments to hedging relationships that existed at January 1, 2020 or were designated thereafter and that are directly affected by interest rate benchmark reform. These amendments also apply to the gain or loss recognized in OCI that existed at January 1, 2020.

Managing interest rate benchmark reform and any risks arising due to reform

A fundamental reform of major interest rate benchmarks is being undertaken globally, including the replacement of interbank offered rates (IBORs) with alternative nearly risk-free rates (referred to as 'IBOR reform'). Due to the nature of its business, the Bank portfolio is predominantly made up of short-term fixed rate assets and liabilities. However, the Bank has exposures to IBORs (USD Libor only) on its financial instruments that will be replaced or reformed as part of these market-wide initiatives. There is uncertainty over the timing and the methods of transition. The Bank anticipates that IBOR reform will impact its risk management and hedge accounting.

The Libor Transition Steering Committee (LTSC) monitors and manages the transition to alternative rates. The committee evaluates the extent to which contracts reference IBOR cash flows, whether such contracts will need to be amended as a result of IBOR reform and how to manage communication about IBOR reform with counterparties. The committee reports to the Board of directors and collaborates with other business functions as needed. It provides periodic reports to management of interest rate risk and risks arising from IBOR reform.

Derivatives held for risk management purposes and hedge accounting

Derivatives

The Bank holds interest rate swaps for risk management purposes, which are designated in cash flow hedging relationships. The interest rate swaps have floating legs that are indexed to USD Libor. The Bank's derivative instruments are governed by the International Swaps and Derivatives Association (ISDA)'s Master Agreement.

ISDA is currently reviewing its standardized contracts in the light of IBOR reform. When ISDA has completed its review, the Bank expects to negotiate the inclusion of new fallback clauses with its derivative counterparties. No derivative instruments have been modified as at June 30, 2020.

3. Changes in significant accounting policies (continued)

3.1 New accounting policies and amendments adopted (continued)

Hedge accounting

The Bank evaluated the extent to which its cash flow hedging relationships are subject to uncertainty driven by IBOR reform as of June 30, 2020. The Bank's hedged items and hedging instruments continue to be indexed to IBOR benchmark rates, i.e. USD Libor. IBOR benchmark rates are quoted each day and IBOR cash flows are exchanged with its counterparties as usual. However, the Bank's cash flow hedging relationships extend beyond the anticipated cessation date for USD LIBOR. The Bank expects that USD LIBOR will be discontinued after the end of 2021. The preferred alternative reference rate is Secured Overnight Financing Rate (SOFR). However, there is uncertainty as to when and how replacement may occur with respect to the relevant hedged item and hedging instrument. Such uncertainty may impact the hedging relationship and its effectiveness assessment. The Bank applies the amendments to IFRS 9 issued in September 2019 to those hedging relationships directly affected by IBOR reform.

Hedging relationships impacted by IBOR reform may experience ineffectiveness attributable to market participants' expectations of when the shift from the existing IBOR benchmark rate to an alternative benchmark interest rate will occur. This transition may occur at different times for the hedged item and hedging instrument, which may lead to hedge ineffectiveness. The Bank has measured its hedging instrument indexed to USD LIBOR using available quoted market rates for LIBOR-based instruments of the same tenor and similar maturity and has measured the cumulative change in present value of hedged cash flows on a similar basis

The Bank's exposure to USD LIBOR designated in a hedging relationship is US\$20million nominal amount at June 30, 2020 attributable to the interest rate swap hedging USD LIBOR cash flows on the same principal amount of the Bank's USD-denominated bond issuances maturing in 2023.

For the purpose of evaluating whether there is an economic relationship between the hedged item(s) and the hedging instrument(s), the Bank assumes that the benchmark interest rate is not altered as a result of IBOR reform.

The Bank will cease to apply the amendments to its assessment of the economic relationship between the hedged item and the hedging instrument when the uncertainty arising from IBOR reform is no longer present with respect to the timing and the amount of the interest rate benchmark-based cash flows of the hedged item or hedging instrument, or when the hedging relationship is discontinued. For its highly probable assessment of the hedged item, the Bank will no longer apply the amendments when the uncertainty arising from IBOR reform about the timing and amount of the interest rate benchmark-based future cash flows of the hedged item is no longer present, or when the hedging relationship is discontinued.

3.2 New accounting policies and amendments not yet adopted

In May 2020, the IASB (International Accounting Standards Board) published the document "Rental Lease concessions related to COVID-19", which contains amendments to IFRS 16 Leases effective as of June 1, 2020, in order to provide relief to the lessee with respect to the rental concessions granted as a result of the events of COVID-19, where in the existing event the lessee must re-measure the responsibility of the lease using a revised discount rate.

At the reporting date, the Bank has not modified nor received concessions in the lease agreements signed with third parties.

4. Significant accounting policies

4.1. Judgments, estimates and significant accounting assumptions

A. Estimates and assumptions

The key assumptions concerning the future and other key sources of estimating uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Bank based its assumptions and estimates on parameters available when the consolidated financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances beyond the control of the Bank. Such changes are reflected in the assumptions when they occur.

B. Going concern

The Bank's management has made an assessment of its ability to continue as a going concern and is satisfied that it has the resources to continue in business for the foreseeable future. Therefore, the condensed consolidated financial statements continue to be prepared on a going concern basis.

5. Financial risk

This note presents information about the Bank's exposure to financial risks and the Bank's management of capital.

A. Credit risk

i. Credit quality analysis

The following tables set out information about the credit quality of financial assets measured at amortized cost, and securities at FVOCI. Unless specifically indicated, for financial assets the amounts in the table represent the outstanding balances. For loan commitments and financial guarantee contracts, the amounts in the table represent the amounts committed or guaranteed, respectively.

The Bank's Management has not made any adjustment to the methodology and key inputs used to determine the PD and LGD parameters produced by the model.

Foreign exchange forwards	74,471	625	(2,575)
Total	965,673	11,157	(14,675)

ii. Collateral and other credit enhancements

The amount and type of collateral required depends on an assessment of the credit risk of the counterparty. Guidelines are in place covering the acceptability and valuation of each type of collateral.

Derivatives and repurchase agreements

In the ordinary course of business, the Bank enters into derivative financial instrument transactions and securities sold under repurchase agreements under industry standards agreements. Depending on the collateral requirements stated in the contracts, the Bank and counterparties can receive or deliver collateral based on the fair value of the financial instruments transacted between parties. Collateral typically consists of pledged cash deposits and securities. The master netting agreements include clauses that, in the event of default, provide for close-out netting, which allows all positions with the defaulting counterparty to be terminated and net settled with a single payment amount.

The International Swaps and Derivatives Association master agreement ("ISDA") and similar master netting arrangements do not meet the criteria for offsetting in the consolidated statement of financial position. This is because they create for the parties to the agreement a right of set-off of recognized amounts that is enforceable only following an event of default, insolvency or bankruptcy of the Bank or the counterparties or following other predetermined events.

5. Financial risk (continued)

A. Credit risk (continued)

Such arrangements provide for single net settlement of all financial instruments covered by the agreements in the event of default on any one contract. Master netting arrangements do not normally result in an offset of balance-sheet assets and liabilities unless certain conditions for offsetting are met.

Although master netting arrangements may significantly reduce credit risk, it should be noted that:

- Credit risk is eliminated only to the extent that amounts due to the same counterparty will be settled after the assets are realized.
- The extent to which overall credit risk is reduced may change substantially within a short period because the exposure is affected by each transaction subject to the arrangement.

Loans

The main types of collateral obtained are, as follows:

- For commercial lending, liens on real estate property, inventory and trade receivables.

The Bank also obtains guarantees from parent companies for loans to their subsidiaries. Management monitors the market value of collateral and will request additional collateral in accordance with the underlying agreement. It is the Bank's policy to dispose of repossessed property in an orderly fashion. The proceeds are used to reduce or repay the outstanding claim. In general, the Bank does not occupy repossessed property for business use.

The Bank holds guarantees and other financial credit enhancements against certain exposures in the loan portfolio. As of June 30, 2020, and December 31, 2019, the coverage ratio to the carrying amount of the loan portfolio was 16% and 12% respectively.

iii. Implementation of forward-looking information

The Bank incorporates information of the economic environments on a forward-looking view, when assessing whether the credit risk of a financial instrument has significantly increased, since initial recognition through customer and country rating models which include projections of the inputs under analysis.

Supplementary, for the expected credit loss measurement the results of the "alert model" can be considered, which are analyzed through a severity indicator to total risk resulting from the estimates and assumptions of several macroeconomics factors. These estimates and assumptions are supported by a base scenario associated to a probability of occurrence of 95%. Other scenarios represent optimistic and pessimistic results. The implementation and interpretation of the outcomes of the alert are based on the expert judgement of management, based on suggestions of areas such as Credit Risk, Economic Studies and Loan Recovery of the Bank.

The external information could include economic data and projections published by governmental committees, monetary agencies (e.g., Federal Reserve Bank and from countries where the Bank operates), supranational organizations (International Monetary Fund, The World Bank, World Trade Organization), private sector, academic projections, credit rating agencies, among other.

5. Financial risk (continued)

A. Credit risk (continued)

Principal macroeconomics variables of the country rating model with forward-looking scenarios are:

Variables	Description
GDP Growth (Var. %)	% Variation in the growth of the Gross Domestic Product (GDP)
ComEx Growth (Var. %)	% Variation in foreign trade growth (Exp. + Imp.)

The model uses, as main inputs, the following macroeconomic variables: the percentage variation of the gross domestic product of Latin America and the percentage of the foreign trade index growth. The main movements and changes in the variables are analyzed, in general and in particular for each country in the region. This historical and projected information over a period of five years allows Management a complementary means to estimate the macroeconomic effects in the Bank's portfolio.

The table below lists the macroeconomic assumptions by country used in the base, optimistic and pessimistic scenarios over the five-year forecasted average available for each reporting period.

Country	Scenario	Variable			
		GDP Growth (Var.%)		ComEx Growth Index (Var.%)

New financial assets originated or purchased	7,592	670	85	-	8,347
Total	<u>(1,882)</u>	<u>(905)</u>	<u>90</u>	<u>-</u>	<u>(2,696)</u>
		Loan commitments and financial guarantee contracts	Securities		
			At amortized cost	FVOCI	Total
June 30, 2019	Loans				
Net effect of changes in allowance for expected credit losses	9,493	252	(8)	40	9,777
Financial instruments that have been derecognized during the year	(26,063)	(2,471)	(17)	(14)	(28,565)
New financial assets originated or purchased	19,049	1,484	8	-	20,541
Total	<u>2,479</u>	<u>(735)</u>	<u>(17)</u>	<u>26</u>	<u>1,753</u>

5. Financial risk (continued)

A. Credit risk (continued)

v. Credit-impaired financial assets

Credit-impaired loans and advances are graded 8 to 10 in the Bank's internal credit risk grading system.

The following table sets out a reconciliation of changes in the net carrying amount of credit-impaired loans.

	June 30, 2020	December 31, 2019
Credit-impaired loans and advances at beginning of period	54,573	49,439
Change in expected credit losses allowance	(2,856)	7,164
Recoveries of amounts previously written off	114	52
Interest income	275	323
Write-offs	(52,106)	(2,405)
Credit-impaired loans and advances at end of period	<u>-</u>	<u>54,573</u>

During the period ended June 30, 2020, the sale of the outstanding credit-impaired loan in Stage 3, classified at amortized cost, was made at \$11.6 million. This sale resulted in a write off against the credit loss allowance of \$ 52.1 million.

vi. Concentrations of credit risk

The Bank monitors concentrations of credit risk by sector, industry and by country. An analysis of concentrations of credit risk from loans, loan commitments, financial guarantees and investment securities is as follows.

5. Financial risk (continued)

A. Credit risk (continued)

vii. Offsetting financial assets and liabilities

The following tables include financial assets and liabilities that are offset in the condensed consolidated interim financial statement or subject to an enforceable master netting arrangement:

a) Derivative financial instruments – assets

June 30, 2020						
Description	Gross amounts of assets	Gross amounts offset in the consolidated statement of financial position	Net amount of assets presented in the consolidated statement of financial position	Gross amounts not offset in the consolidated statement of financial position		Net Amount
				Financial instruments	Cash collateral received	
Derivative financial instruments used for hedging	8,615	-	8,615	-	(3,536)	5,079
Total	<u>8,615</u>	<u>-</u>	<u>8,615</u>	<u>-</u>	<u>(3,536)</u>	<u>5,079</u>
December 31, 2019						
Description	Gross amounts of assets	Gross amounts offset in the consolidated statement of financial position	Net amount of assets presented in the consolidated statement of financial position	Gross amounts not offset in the consolidated statement of financial position		Net Amount
				Financial instruments	Cash collateral received	
Derivative financial instruments used for hedging	11,157	-	11,157	-	(9,350)	1,807
Total	<u>11,157</u>	<u>-</u>	<u>11,157</u>	<u>-</u>	<u>(9,350)</u>	<u>1,807</u>

5. Financial risk (continued)

A. Credit risk (continued)

b) Securities sold under repurchase and derivative financial instruments – liabilities

June 30, 2020						
Description	Gross amounts of liabilities	Gross amounts offset in the consolidated statement of financial position	Net amount of liabilities presented in the consolidated statement of financial position	Gross amounts not offset in the consolidated statement of financial position		Net Amount
				Financial instruments	Cash collateral pledged	
Securities sold under repurchase agreements	(10,403)	-	(10,403)	11,229	2,685	3,511
Derivative financial instruments used for hedging	(52,193)	-	(52,193)	-	55,166	2,973
Total	(62,596)	-	(62,596)	11,229	57,851	6,484

December 31, 2019						
Description	Gross amounts of liabilities	Gross amounts offset in the consolidated statement of financial position	Net amount of liabilities presented in the consolidated statement of financial position	Gross amounts not offset in the consolidated statement of financial position		Net Amount
				Financial instruments	Cash collateral pledged	
Securities sold under repurchase agreements	(40,530)	-	(40,530)	41,937	320	1,727
Derivative financial instruments used for hedging	(14,675)	-	(14,675)	-	14,632	(43)
Total	(55,205)	-	(55,205)	41,937	14,952	1,684

5. Financial risk (continued)

B. Liquidity risk

i. Exposure to liquidity risk

The key measure used by the Bank for managing liquidity risk is the ratio of net liquid assets to deposits from customers and short-term funding. For this purpose, 'net liquid assets' includes cash and cash equivalents which consist of deposits from banks, customers, debt securities issued, other borrowings and commitments maturing within the next month.

The following table details the Bank's liquidity ratios, described in the previous paragraph, for the six months period ended on June 30, 2020 and for the year ended December 31, 2019, respectively:

	June 30, 2020	December 31, 2019
At the end of the period	179.98%	52.48%
Period average	118.66%	37.82%
Maximum of the period	234.38%	53.38%
Minimum of the period	53.26%	23.23%

The following table include the Bank's liquid assets by geographical location:

(in millions of USD dollars)	June 30, 2020	December 31, 2019
United State of America	1,849	1,132
Other O.E.C.D countries	100	4
Latin America	10	4
Other countries	-	20
Total	1,959	1,160

The following table includes the Bank's demand deposits from customers and its ratio to total deposits from customers:

(in millions of USD dollars)	June 30, 2020	December 31, 2019
Demand liabilities and "overnight"	933	86
% Demand liabilities and "overnight" of total deposits	32.32%	2.97%

The liquidity requirements resulting from the Bank's demand deposits from customers is satisfied by the Bank's liquid assets as follows:

(in millions of USD dollars)	June 30, 2020	December 31, 2019
Total liquid assets	1,964	1,160
% Total assets of total liabilities	35.55%	40.15%
% Total liquid assets in the U.S. Federal Reserve	90.30%	97.37%

5. Financial risk (continued)

B. Liquidity risk (continued)

The remaining liquid assets were composed of short-term deposits in other banks.

Even though the average term of the Bank's assets exceeds the average term of its liabilities, the associated liquidity risk is diminished by the short-term nature of a significant portion of the loan portfolio, since the Bank is primarily engaged in financing foreign trade.

The following table includes the carrying amount for the Bank's loans and securities short-term portfolio with maturity within one year based on their original contractual term together with its average remaining term:

(in millions of USD dollars)	June 30, 2020	December 31, 2019
Loan portfolio and investment portfolio less than/equal to 1 year according to its original term	2,389	3,485
Average term (days)	203	189

The following table includes the carrying amount for the Bank's loans and securities medium term portfolio with maturity based over one year based on their original contractual term together with its average remaining term:

(in millions of USD dollars)	June 30, 2020	December 31, 2019
Loan portfolio and investment portfolio greater than/equal to 1 year according to its original term	2,196	2,497
Average term (days)	2,223	1,185

5. Financial risk (continued)

B. Liquidity risk (continued)

ii. Maturity analysis for financial liabilities and financial assets

The following table details the future undiscounted cash flows of assets and liabilities grouped by their remaining maturity with respect to the contractual maturity:

Description	June 30, 2020					Gross Inflow (outflow)	Carrying amount

Net position	(989,696)	150,446	737,925	649,254	143,812	691,741	510,458

The amounts in the table above have been compiled as follows:

Type of financial instrument	Basis on which amounts are compiled
Financial assets and liabilities	Undiscounted cash flows, which include estimated interest payments.
Issued financial guarantee contracts, and loan commitments	Earliest possible contractual maturity. For issued financial guarantee contracts, the maximum amount of the guarantee is allocated to the earliest period in which the guarantee could be called.
Derivative financial liabilities and financial assets	Contractual undiscounted cash flows. The amounts shown are the gross nominal inflows and outflows for derivatives that have simultaneous gross and the net amounts for derivatives that are net settled.

5. Financial risk (continued)

B. Liquidity risk (continued)

iii. Liquidity reserves

As part of the management of liquidity risk arising from financial liabilities, the Bank holds liquid assets comprising cash and cash equivalents.

The following table sets out the components of the Banks's liquidity reserves:

	June 30, 2020		December 31, 2018	
	Amount	Fair Value	Amount	Fair Value
Balance with Central Banks	1,773,029	1,773,029	1,129,016	1,129,016
Cash and balances with other bank	248,336	248,336	49,154	49,154
Total Liquidity reserves	2,021,365	2,021,365	1,178,170	1,178,170

iv. Financial assets available to support future funding

The following table sets out the Bank's financial assets available to support future funding:

June 30, 2020		
	Guaranteed	Available as collateral
Cash and due from banks	57,851	1,963,514
Notional of investment securities	10,950	83,249
Loan portfolio	-	4,485,553
Total assets	68,801	6,532,316
December 31, 2019		
	Guaranteed	Available as collateral
Cash and due from banks	18,452	1,159,718
Notional of investment securities	40,531	38,045
Loan portfolio	-	5,823,333
Total assets	58,983	7,021,096

5. Financial risk (continued)

C. Market risk

The Bank manages market risk by considering the consolidated financial situation of the Bank.

i. Interest rate risk

The following is a summary of the Bank's interest rate gap position for the financial assets and liabilities based on their next repricing date:

Description	June 30, 2020						Total
	Up to 3 months	3 to 6 months	6 months to 1 year	1 to 5 years	More than 5 years	Non interest rate risk	
Assets							
Demand deposits and time deposits	2,005,998	-	-	-	-	-	2,005,998
Securities and other financial assets	9,100	3,000	18,549	65,286	-	3,500	99,435
Loans	2,911,658	884,425	541,985	136,892	10,593	-	4,485,553
Total assets	4,926,756	887,425	560,534	202,178	10,593	3,500	6,590,986
Liabilities							
Demand deposits and time deposits	(2,665,526)	(208,690)	(12,000)	-	-	-	(2,886,216)
Securities sold repurchase agreements	(4,675)	-	(5,728)	-	-	-	(10,403)
Borrowings and debt	(2,005,873)	(119,016)	(125,000)	(357,965)	-	(19,362)	(2,627,216)
Total liabilities	(4,676,074)	(327,706)	(142,728)	(357,965)	-	(19,362)	(5,523,835)
Net effect of derivative financial instruments held for interest risk management	4,468	(829)	(229)	(46,988)	-	-	(43,578)
Total interest rate sensitivity	255,150	558,890	417,577	(202,775)	10,593	(15,862)	1,023,573

Description	December 31, 2019						Total
	Up to 3 months	3 to 6 months	6 months to 1 year	1 to 5 years	More than 5 years	Non interest rate risk	
Assets							
Demand deposits and time deposits	1,170,092	-	-	-	-	-	1,170,092
Securities and other financial assets	14,935	6,351	5,055	53,300	-	-	79,641
Loans	4,031,432	1,096,355	548,028	208,443	8,739	-	5,892,997
Total assets	5,216,459	1,102,706	553,083	261,743	8,739	-	7,142,730
Liabilities							
Demand deposits and time deposits	(2,570,324)	(197,300)	(120,419)	-	-	(293)	(2,888,336)
Securities sold repurchase agreements	(40,530)	-	-	-	-	-	(40,530)
Borrowings and debt	(2,534,382)	(401,432)	(25,261)	(157,321)	-	(19,914)	(3,138,310)
Total liabilities	(5,145,236)	(598,732)	(145,680)	(157,321)	-	(20,207)	(6,067,176)
Net effect of derivative financial instruments held for interest risk management	(2,425)	(150)	(1,711)	(1,482)	-	-	(5,768)
Total interest rate sensitivity	68,798	503,824	405,692	102,940	8,739	(20,207)	1,069,786

Management of interest rate risk is complemented by monitoring the sensitivity of the Bank's financial assets and liabilities to various standard interest rate scenarios. Standard scenarios that are considered on a monthly basis include a 50bps, 100bps and 200bps, respectively, parallel fall or rise in all yield curves which are assessed accordingly to market conditions.

5. Financial risk (continued)

C. Market risk (continued)

ii. Interest rate risk (continued)

The following is an analysis of the Bank's sensitivity to the most likely increase or decrease in market interest rates at the reporting date, assuming no asymmetrical movements in yield curves and a constant financial position:

	Change in interest rate	Effect on profit or loss	Effect on Equity
June 30, 2020	+50 bps	(5,133)	(4,526)
	-50 bps	2,420	1,813
December 31, 2019	+50 bps	3,064	7,461
	-50 bps	(3,064)	(7,461)

Interest rate movements affect reported equity in the following ways:

- Retained earnings: increases or decreases in net interest income and in fair values of derivatives reported in profit or loss;
- Fair value reserve: increases or decreases in fair values of financial assets at FVOCI reported directly in equity; and
- Hedging reserve: increases or decreases in fair values of hedging instruments designated in qualifying cash flow hedge relationships.

This sensitivity provides a consideration of changes in interest rates, considering last period interest rate volatility.

The following table presents the maximum exposure amount in foreign currency of the Bank's carrying amount of total assets and liabilities, excluding derivative financial assets and liabilities which are included in other assets and liabilities based on their fair value.

iii. Foreign exchange risk

	June 30, 2020						
	Brazilian Real	European Euro	Japanese Yen	Colombian Peso	Mexican Peso	Other Currencies (1)	Total
Exchange rate	5.43	1.12	107.96	3,758.06	22.99

6. Financial risk management - Impacts and actions implemented in the context of COVID-19

The COVID-19 pandemic and the measures implemented globally to prevent its spread could negatively impact the Bank's business in a number of ways. These impacts may include, among others, reduced business volumes, restricted access to funding sources, insufficient liquidity, delayed or defaulted payments from the Bank's customers or from the Bank's financial counterparties, increased levels of indebtedness or the unavailability of sufficient financing for the Bank's borrowers, and other factors which are beyond the Bank's control.

In this context, and in order to mitigate these risks, the Bank has implemented a series of measures and actions described below.

i. Liquidity Risk

Following the COVID-19 pandemic and its potential impact on the availability of resources, the Bank activated its Liquidity Contingency Plan, based on internally designed market triggers, in order to ensure a robust position given the situation caused by the pandemic. This led the Bank to adjust the scenario of its internal liquidity coverage ratio "LCR" from a regular level of 1 to a level of 3, which implies more restrictive assumptions for inflows and outflows of cash, with a downward adjustment of the percentages of funding sources renewals and of loan portfolio collections. Other additional elements included in the Liquidity Contingency Plan are, among others, the collection of all loan maturities and the case-by-case approval of all new credit disbursements by the Credit Committee, establishing at least biweekly meetings.

Following the execution of the previously described Liquidity Contingency Plan, Bladex achieved a significant increase in its cash position in a short period of time, managing to continuously maintain a robust level of liquidity, exceeding regulatory requirements.

The Bank's capacity to maintain these strong liquidity levels, even in the current context, is attributable to historically diversified and stable funding sources, including deposits from central banks in Latin America and the Caribbean, who are also the Bank's Class A shareholders. In addition, the Bank has maintained a fluid access to a significant base of correspondent banks and investors from debt capital markets across the globe, which have maintained and even increased their availability of funding to the Bank in the last few months. Furthermore, the Bank has been able to collect on the majority of scheduled maturities of its loan portfolio and has then disbursed new transactions on a selective basis, prioritizing prudent risk management over loan growth, with a focus on adequate levels of risk / return.

The Bank intends to maintain this additional level of liquidity as long as the current environment of volatility and uncertainty remains, therefore it will continue to give preference to maintaining a resilient and robust liquidity position over the growth of its balance sheet and / or its profitability.

ii. Credit Risk

The Bank determines the appropriate level of allowances for expected credit losses based on a forward-looking process that estimates the probable loss inherent in its Credit Portfolio, which is the result of a statistical analysis supported by the Bank's historical portfolio performance, external sources, and the judgment of the Bank's management. This level of allowance reflects assumptions and estimates made in the context of changing political and economic conditions in the Region, including but not limited to the impact of recent ongoing turmoil related to COVID-19.

The Bank has a Business Model mainly focused on financial institutions and large corporations, a portion of which represents "quasi-sovereign" risks, with an average short-term duration, allowing an agile adjustment of exposure in adverse scenarios.

Actions implemented due to the COVID-19 pandemic

In late March 2020, due to the context, Bladex elaborated a heat map including each country and industry in which it maintains exposure. This allowed the Bank to identify customers with higher levels of risk depending on the country, industry and financial position.

6. Financial risk management - Impacts and actions implemented in the context of COVID-19 (continued)

ii. Credit Risk (continued)

Four main variables were used to assign the level of customer risk:

Financial Institutions	Corporations
a. COVID-19 business impact	a. COVID-19 business impact
b. Portfolio quality and coverage levels	a. Foreign currency exchange risk
b. Solvency level	i. Commodity risk
ii. Liquidity position	d. Liquidity position

The Bank's Management holds conference and video calls frequently with its customers, focusing on those operating in higher risk industries. Any relevant information is presented to the Credit Committee.

Since the beginning of the crisis, in mid-March 2020, the loan portfolio has been reduced, as a result of the Bank's strategy to prioritize liquidity and to adjust the portfolio's credit risk. Under the Liquidity Contingency Plan, all operations are approved on a case-by-case basis by the Credit Committee with a meeting frequency of at least twice per week.

The permanent review of transactions maturing in a 90-day horizon, has allowed the Bank to take quick actions to collect and to identify cases with a higher level of risk. Moreover, the Bank is assessing on a periodic basis the adequacy of the allowances for credit losses.

iii. Market Risk

The Bank's Management has not made any material adjustments to the Market Risk valuation metrics and models.

iv. Cybersecurity Risk

Actions implemented due to the COVID-19 pandemic

The Bank successfully implemented its Business Continuity Plan, implicating among other things, that 100% of its staff is working remotely (Telecommuting).

This has increased the frequency of risks associated with Cybersecurity, among them:

- Increased e-mail attack attempts.
- Increased attack attempts due to the widespread use of remote connection protocols.

To counteract these risks, the Bank's Management has reinforced the controls as follows:

- Monitoring of main attack vectors was expanded: e-mail and end-user devices.
- Awareness and training activities within the organization were reinforced.
- Frequency of vulnerability scans has been intensified.

7. Fair value of financial instruments

The Bank determines the fair value of its financial instruments using the fair value hierarchy established in IFRS 13 - Fair Value Measurements and Disclosure, which requires the Bank to maximize the use of observable inputs (those that reflect the assumptions that market participants would use in pricing the asset or liability developed based on market information obtained from sources independent of the reporting entity) and to minimize the use of unobservable inputs (those that reflect the reporting entity's own assumptions about the inputs that market participants would use in pricing the asset or liability developed based on the best information available in the circumstances) when measuring fair value. Fair value is used on a recurring basis to measure assets and liabilities in which fair value is the primary basis of accounting. Additionally, fair value is used on a non-recurring basis to assess assets and liabilities for impairment or for disclosure purposes. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Depending on the nature of the asset or liability, the Bank uses some valuation techniques and assumptions when estimating fair value.

The Bank applied the following fair value hierarchy:

Level 1 – Assets or liabilities for which an identical instrument is traded in an active market, such as publicly-traded instruments or futures contracts.

Level 2 – Assets or liabilities valued based on observable market data for similar instruments, quoted prices in markets that are not active; or other observable inputs that can be corroborated by observable market data for substantially the full term of the asset or liability.

Level 3 – Assets or liabilities for which significant valuation inputs are not readily observable in the market; instruments measured based on the best available information, which might include some internally-developed data, and considers risk premiums that a market participant would require.

When determining the fair value measurements for assets and liabilities that are required or permitted to be recorded at fair value, the Bank considers the principal or most advantageous market in which it would transact and considers the inputs that market participants would use when pricing the asset or liability. When possible, the Bank uses active markets and observable prices to value identical assets or liabilities.

When identical assets and liabilities are not traded in active markets, the Bank uses observable market information for similar assets and liabilities. However, certain assets and liabilities are not actively traded in observable markets and the Bank must use alternative valuation techniques to determine the fair value measurement. The frequency of transactions, the size of the bid-ask spread, and the size of the investment are factors considered in determining the liquidity of markets and the relevance of observed prices in those markets.

When there has been a significant decrease in the valuation of the financial asset or liability, or in the level of activity for a financial asset or liability, the Bank uses the present value technique which considers market information to determine a representative fair value in usual market conditions.

A description of the valuation methodologies used for assets and liabilities measured at fair value on a recurring basis, including the general classification of such assets and liabilities under the fair value hierarchy is presented below:

A. Recurring valuation

Financial instruments at FVTPL and FVOCI

Financial instruments at FVTPL and FVOCI are carried at fair value, which is based upon quoted prices when available, or if quoted market prices are not available, on discounted expected cash flows using market rates commensurate with the credit quality and maturity of the security.

7. Fair value of financial instruments (continued)

When quoted prices are available in an active market, financial instruments at FVTPL and financial instruments at FVOCI are classified in level 1 of the fair value hierarchy. If quoted market prices are not available or they are available in markets that are not active, then fair values are estimated based upon quoted prices for similar instruments, or where these are not available, by using internal valuation techniques, principally discounted cash flows models. Such securities are classified within levels 2 and 3 of the fair value hierarchy.

Derivative financial instruments and hedged items that qualify as a fair value hedging relationship

The valuation techniques and inputs depend on the type of derivative and the nature of the underlying instrument. Exchange-traded derivatives that are valued using quoted prices are classified within level 1 of the fair value hierarchy.

For those derivative contracts without quoted market prices, fair value is based on internal valuation techniques using inputs that are readily observable and that can be validated by information available in the market. The principal technique used to value these instruments is the discounted cash flows model and the key inputs considered in this technique include interest rate yield curves and foreign exchange rates. These derivatives are classified within level 2 of the fair value hierarchy.

The fair value adjustments applied by the Bank to its derivative carrying values include credit valuation adjustments (“CVA”), which are applied to OTC derivative instruments, in which the base valuation generally discounts expected cash flows using the Overnight Index Swap (“OIS”) interest rate curves. Because not all counterparties have the same credit risk as that implied by the relevant OIS curve, a CVA is necessary to incorporate the market view of both, counterparty credit risk and the Bank’s own credit risk, in the valuation.

Own-credit and counterparty CVA is determined using a fair value curve consistent with the Bank’s or counterparty credit rating. The CVA is designed to incorporate a market view of the credit risk inherent in the derivative portfolio. However, most of the Bank’s derivative instruments are negotiated bilateral contracts and are not commonly transferred to third parties. Derivative instruments are normally settled contractually, or if terminated early, are terminated at a value negotiated bilaterally between the counterparties. Therefore, the CVA (both counterparty and own-credit) may not be realized upon a settlement or termination in the normal course of business. In addition, all or a portion of the CVA may be reversed or otherwise adjusted in future periods in the event of changes in the credit risk of the Bank or its counterparties or due to the anticipated termination of the transactions.

Financial instruments assets and liabilities recognized and designated as hedged items that qualify as a fair value hedging relationship are measured at amortized cost and adjusted for the effect of the risks covered in the hedging relationship.

7. Fair value of financial instruments (continued)

A. Recurring valuation (continued)

Financial instruments measured at fair value on a recurring basis by caption on the consolidated statement of financial position using the fair value hierarchy are described below:

	June 30, 2020			
	Level 1	Level 2	Level 3	Total
Assets				
Securities and other financial assets:				
Securities at FVOCI - Sovereign debt	-	5,153	-	5,153
Debt instrument at fair value through profit or loss	-		3,500	3,500
Total securities and other financial assets	-	8,653	3,500	8,653
Derivative financial instruments - assets:				
Interest rate swaps	-	1,343	-	1,343
Cross-currency swaps	-	4,028	-	4,028
Foreign exchange forwards	-	3,244	-	3,244
Total derivative financial instrument assets	-	8,615	-	8,615
Total assets at fair value	-	17,268	3,500	17,268
Liabilities				
Derivative financial instruments - liabilities:				
Interest rate swaps	-	2,545	-	2,545
Cross-currency swaps	-	49,597	-	49,597
Foreign exchange forwards	-	51	-	51
Total derivative financial instruments - liabilities	-	52,193	-	52,193
Total liabilities at fair value	-	52,193	-	52,193

7. Fair value of financial instruments (continued)

A. Recurring valuation (continued)

	December 31, 2019			
	Level 1	Level 2	Level 3	Total
Assets				
Securities and other financial assets:				
Securities at FVOCI - Sovereign debt	-	5,094	-	5,094
Equity instrument at FVOCI	-	1,889	-	1,889
Debt instrument at fair value through profit or loss	-	-	6,492	6,492
Total securities and other financial assets	-	6,983	6,492	13,475
Derivative financial instruments - assets:				
Interest rate swaps	-	407	-	407
Cross-currency swaps	-	10,125	-	10,125
Foreign exchange forwards	-	625	-	625
Total derivative financial instrument assets	-	11,157	-	11,157
Total assets at fair value	-	18,140	6,492	24,632
Liabilities				
Derivative financial instruments - liabilities:				
Interest rate swaps	-	1,903	-	1,903
Cross-currency swaps	-	10,197	-	10,197
Foreign exchange forwards	-	2,575	-	2,575
Total derivative financial instruments - liabilities	-	14,675	-	14,675
Total liabilities at fair value	-	14,675	-	14,675

Fair value calculations are provided only for a limited portion of assets and liabilities. Due to the wide range of valuation techniques and the degree of subjectivity used for estimates, comparisons of fair value information disclosed by the Bank with those of other companies may not be meaningful for comparative analysis.

7. Fair value of financial instruments (continued)

B. Non-recurring valuation

The following methods and inputs were used by the Bank's management in estimating the fair values of financial instruments whose fair value is not measured on a recurring basis:

Financial instruments with carrying value that approximates fair value

The carrying value of certain financial assets, including cash and due from banks, interest-bearing deposits in banks, customers' liabilities under acceptances and certain financial liabilities including customer's demand and time deposits, securities sold under repurchase agreements and acceptances outstanding, due to their short-term nature, is considered to approximate their fair value. These instruments are classified in Level 2.

Securities at amortized cost

The fair value has been estimated upon current market quotations, where available. If quoted market prices are not available, fair value has been estimated based upon quoted prices of similar instruments, or where these are not available, on discounted expected future cash flows using market rates commensurate with the credit quality and maturity of the security. These securities are classified in Levels 2 and 3.

Loans

The fair value of the loan portfolio, including impaired loans, is estimated by discounting expected future cash flows using the current rates at which loans would be made to borrowers with similar credit ratings and for the same remaining maturities, considering the contractual terms in effect as of June 30 of the relevant year. These assets are classified in Levels 2 and 3.

Transfer of financial assets

Gains or losses on sale of loans depend in part on the carrying amount of the financial assets involved in the transfer, and their fair value at the date of transfer. The fair value of these instruments is determined based upon quoted market prices when available or is based on the present value of future expected cash flows using information related to credit losses, prepayment speeds, forward yield curves, and discounted rates commensurate with the risk involved.

Short and long-term borrowings and debt

The fair value of short and long-term borrowings and debt is estimated using discounted contractual future cash flows based on the current incremental borrowing rates for similar types of borrowing arrangements, considering the changes in the Bank's credit margin. These liabilities are classified in Level 2.

7. Fair value of financial instruments (continued)

B. Non-recurring valuation (continued)

The following table provides information on the carrying value and an estimated fair value of the Bank's financial instruments that are not measured on a recurring basis:

	June 30, 2020				
	Carrying value	Fair value	Level 1	Level 2	Level 3
Assets					
Cash and deposits on banks	2,021,365	2,021,365	-	2,021,365	-
Securities at amortized cost ⁽¹⁾	91,522	91,344	-	74,697	16,647
Loans, net ⁽²⁾	4,464,353	4,416,475	-	4,416,475	-
Customers' liabilities under acceptances	3,444	3,444	-	3,444	-
Investment properties	3,354	3,354	-	-	3,354
Liabilities					
Deposits	2,886,216	2,886,216	-	2,886,216	-
Securities sold under repurchase agreements	10,403	10,403	-	10,403	-
Borrowings and debt, net ⁽³⁾	2,607,854	2,597,376	-	2,597,376	-
Customers' liabilities under acceptances	3,444	3,444	-	3,444	-
	December 31, 2019				
	Carrying value	Fair value	Level 1	Level 2	Level 3
Assets					
Cash and deposits on banks	1,178,170	1,178,170	-	1,178,170	-
Securities at amortized cost ⁽¹⁾	75,271	75,724	-	56,914	18,810
Loans, net ⁽²⁾	5,823,333	6,162,885	-	6,101,040	61,845
Customers' liabilities under acceptances	115,682	115,682	-	115,682	-
Investment properties	3,494	3,494	-	-	3,494
Liabilities					
Deposits	2,888,336	2,888,336	-	2,888,336	-
Securities sold under repurchase agreements	40,530	40,530	-	40,530	-
Borrowings and debt, net	3,118,396	3,126,333	-	3,126,333	-
Customers' liabilities under acceptances	115,682	115,682	-	115,682	-

(1) The carrying value of securities at amortized cost is net of the accrued interest receivable of \$0.9 million and the allowance for expected credit losses of \$0.2 million as of June 30, 2020 and the accrued interest receivable of \$0.8 million and the allowance for expected credit losses of \$0.1 million as of December 31, 2019.

(2) The carrying value of loans at amortized cost is net of the accrued interest receivable of \$32.4 million, the allowance for expected credit losses of \$45.4 million and unearned interest and deferred fees of \$8.1 million for June 30, 2020, and the accrued interest receivable of \$41.7 million, the allowance for expected credit losses of \$99.3 million and unearned interest and deferred fees of \$12.1 million for December 31, 2019.

(3) Borrowings and debt excludes the lease liabilities for an amount of \$19.4 million and \$19.9 million as of June 30, 2020 and December 31, 2019, respectively.

7. Fair value of financial instruments (continued)

C. Valuation framework

The Bank has an established control framework for the measurement of fair values, which is independent of front office management, to verify the valuation of significant fair value measurements of derivative financial instruments, securities and other financial instrument. Specific controls include:

- Verification of observable pricing.
- Validation of performance of valuation models.
- A review and approval process for new models and changes to existing models.
- Analysis and assessment of significant valuation fluctuations.
- Review of significant unobservable inputs, valuation adjustments and changes to fair value measurement of Level 3 instruments.

D. Level 3 - Fair value measurement

The following table presents the movement of a Level 3 financial instruments measured at fair value:

Carrying amount as of December 31, 2019	6,492
Unrealized loss	(2,992)
Carrying amount as of June 30, 2020	3,500

Significant inputs used to determine fair value for Level 3 financial instruments

The significant inputs used in determining the fair value of instruments categorized as Level 3, using present value techniques, are as follows:

2020	2019
Unobservable inputs	Unobservable inputs
- Discount rate based on the return from CCC Corporate S&P Bond Index	- Discount rate for similar companies of the same business line adjusted due to the debt-equity structure of the issuer
- Probability of occurrence of the flows of each sale or conversion scenario	
	Observable inputs
	- Average recovery factor for companies that reported default – Moody's

	Range of estimates	
	2020	2019
Fair value measurement sensitivity to unobservable inputs – discount rate		
A significant increase in volatility would result in a lower fair value	11.00% to 15.00%	12.97% to 27.50%

As of June 30, 2020, the Management took into consideration that the discount rate based on the return from CCC Corporate S&P Bond Index, which are similar to CCC corporate bonds mostly US/LATAM markets displayed in Bloomberg, allows a more reliable measurement for the instrument.

7. Fair value of financial instruments (continued)

The effect of unobservable inputs on fair value measurement

Although the Bank believes that its estimates of fair value are appropriate, the use of different methodologies or assumptions could lead to different measurements of fair value. For fair value measurements in Level 3, changing one or more of the assumptions used would have the following effects.

<i>Debentures at fair value through profit or loss</i>	<i>Effect on profit or loss</i>
+ 100 bps to the observable and unobservable inputs	(99)
- 100 bps to the unobservable and observable inputs	105

8. Cash and due from banks

The following table presents the details of interest-bearing deposits in banks and pledged deposits:

	June 30, 2020	December 31, 2019
Cash and due from banks	15,367	8,078
Interest-bearing deposits in banks	2,005,998	1,170,092
Total	2,021,365	1,178,170
Less:		
Pledged deposits	62,851	18,452
Total cash and cash equivalents	1,958,514	1,159,718

	June 30, 2020		December 31, 2019	
	Amount	Interest rate range	Amount	Interest rate range
Interest-bearing deposits in banks:				
Demand deposits ⁽¹⁾	1,895,998	0.10% a 3.58%	1,150,092	1.55% a 5.10%
Time deposits	110,000	-	20,000	-
Total	2,005,998		1,170,092	
Pledged deposits	62,851	0.08%	18,452	1.55%

(1) Interest-bearing demand deposits based on daily rates determined by banks. In addition, rates of 3.58% and 5.10% corresponds to a deposit placed in México.

8. Cash and due from banks (continued)

The following table provides a breakdown of pledged deposits by country risk:

	June 30, 2020	December 31, 2019
Country:		
Netherlands	14,834	-
United States of America ⁽¹⁾	13,115	5,645
Spain	12,490	-
Switzerland	10,277	9,567
Mexico	7,670	-
Japan	2,400	1,470
France	1,455	1,770
Canada	610	-
Total	62,851	18,452

(1) Includes pledged deposits of \$5 million at June 30, 2020 and \$3.5 million at December 31, 2019, with the New York State Banking Department under March 1994 legislation and deposits pledged to guarantee derivative financial instrument transactions.

9. Securities and other financial assets, net

All securities and other financial assets as of June 30, 2020 and December 31, 2019 are presented as follows:

		At fair value			
		With changes in other comprehensive income (loss)			
At June 30, 2020		Recyclable to profit and loss	Non-recyclable to profit and loss	With changes in profit or loss	Total securities and other financial assets, net
Carrying amount	Amortized cost				
Principal	90,782	5,153	-	3,500	99,435
Interest receivable	943	48	-	-	991
Reserves	(203)	-	-	-	(203)
	<u>91,522</u>	<u>5,201</u>	<u>-</u>	<u>3,500</u>	<u>100,223</u>
		At fair value			
		With changes in other comprehensive income (loss)			
At December 31, 2019		Recyclable to profit and loss	Non-recyclable to profit and loss	With changes in profit or loss	Total securities and other financial assets, net
Carrying amount	Amortized cost				
Principal	74,547	5,094	1,889	6,492	88,022
Interest receivable	837	48	-	-	885
Reserves	(113)	-	-	-	(113)
	<u>75,271</u>	<u>5,142</u>	<u>1,889</u>	<u>6,492</u>	<u>88,794</u>

As of June 30, 2020, and December 31, 2019, the Bank sold 261,164 and 767,301 shares, respectively, which were designated in their initial recognition at fair value with changes in other comprehensive income due to market changes affecting the liquidity of the instrument. The cumulative fair value of the shares sold was \$1.7 million and \$4.8 million, respectively, and the cumulative loss recognized in OCI was \$602 thousand and \$151 thousand, respectively, transferred to retained earnings.

9. Securities and other financial assets, net (continued)

Securities and other financial assets by contractual maturity are shown in the following table:

At June 30, 2020		At fair value			Total securities and other financial assets, net
		With changes in other comprehensive income			
	Amortized cost	Recyclable to profit and loss	Non-recyclable to profit and loss	With changes in profit or loss	
Due within 1 year	30,880	-	-	-	30,880
After 1 year but within 5 years	59,902	5,153	-	-	65,055
Non maturity	-	-	-	3,500	3,500
Balance - principal	90,782	5,153	-	3,500	99,435

At December 31, 2019		At fair value			Total securities and other financial assets, net
		With changes in other comprehensive income			
	Amortized cost	Recyclable to profit and loss	Non-recyclable to profit and loss	With changes in profit or loss	
Due within 1 year	28,295	-	1,889	-	30,184
After 1 year but within 5 years	46,252	5,094	-	-	51,346
Non maturity	-	-	-	-	-
After 5 years but within 10 years	-	-	-	6,492	6,492
Balance - principal	74,547	5,094	1,889	6,492	88,022

The following table includes the securities pledge to secure repurchase transactions accounted for as secured pledged:

	June 30, 2020			December 31, 2019		
	Amortized cost	Fair value	Total	Amortized cost	Fair value	Total
Securities pledged to secure repurchase transactions	11,229	-	11,229	36,843	5,094	41,937
Securities sold under repurchase agreements	(10,403)	-	(10,403)	(35,647)	(4,883)	(40,530)

The following table presents the realized gains or losses on sale of securities at fair value through other comprehensive income:

	Three months ended June 30th	
	2020	2019
Realized gain on sale of securities	-	54
Realized loss on sale of securities	-	-
Net gain on sale of securities at FVOCI	-	54

9. Securities and other financial assets, net (continued)

	Six months ended June 30th	
	2020	2019
Realized gain on sale of securities	-	163
Realized loss on sale of securities	-	-
Net gain on sale of securities at FVOCI	-	163

10. Loans

The fixed and floating interest rate distribution of the loan portfolio is as follows:

	June 30, 2020	December 31, 2019
Fixed interest rates	2,071,339	2,757,333
Floating interest rates	2,414,214	3,135,664
Total	4,485,553	5,892,997

As of June 30, 2020, and December 31, 2019, 68% and 74% of the loan portfolio at fixed interest rates has remaining maturities of less than 180 days.

As of June 30, 2020, the range of interest rates on loans fluctuates from 0.94% to 10.99% (December 31, 2019 1.20% to 13.93%).

As of June 30, 2020, and December 31, 2019, the Bank had credit transactions in the normal course of business with 11% and 11%, respectively, of its Class "A" and "B" stockholders. All transactions were made based on arm's-length terms and subject to prevailing commercial criteria and market rates and were subject to all of the Bank's Corporate Governance and control procedures. As of June 30, 2020, and December 31, 2019, approximately 10% and 11%, respectively, of the outstanding loan portfolio was placed with the Bank's Class "A" and "B" stockholders and their related parties. As of June 30, 2020, the Bank was not directly or indirectly owned or controlled by another corporation or any foreign government, and no Class "A" or "B" shareholder was the owner of record of more than 3.5% of the total outstanding shares of the voting capital stock of the Bank.

Modified financial assets

The following table refers to modified financial assets during the year, where modification does not result in de-recognition:

	June 30, 2020	December 31, 2019
Gross carrying amount before modification	5,335	-
Allowance loss before modification ⁽¹⁾	(35)	-
Net amortized cost before modification	5,300	-
Gross carrying amount after modification	5,335	-
Allowance loss after modification ⁽²⁾	(148)	-
Net amortized cost after modification	5,187	-

⁽¹⁾ Expected credit loss for 12 months

⁽²⁾ Expected credit loss within the life of the financial asset

10. Loans (continued)

Recognition and derecognition of financial assets

During the period ended June 30, 2020, the sale of the outstanding credit-impaired loan in Stage 3, classified at amortized cost, was made at \$11.6 million. This sale resulted in a write off against the credit loss allowance of \$ 52.1 million. As of June 30, 2019, the Bank sold loans measured at amortized cost. These sales were made based on compliance with the Bank's strategy to optimize credit risk of its loan portfolio.

The amortized cost and gains arising from the derecognition of these financial instruments are presented in the following table. These gains are presented within the line "Gain (loss) on financial instruments, net" in the consolidated statement of profit or loss.

	Assignments and participations	Gains (losses)
Amortized cost during the period ended June 30, 2020	11,565	-
Amortized cost during the period ended June 30, 2019	4,965	-

11. Loan commitments and financial guarantee contracts

In the normal course of business, to meet the financing needs of its customers, the Bank is party to loan commitments and financial guarantee contracts. These instruments involve, to varying degrees, elements of credit and market risk in excess of the amount recognized in the consolidated statement of financial position. Credit risk represents the possibility of loss resulting from the failure of a customer to perform in accordance with the terms of a contract.

The Bank's outstanding loan commitments and financial guarantee contracts are as follows:

	June 30, 2020	December 31, 2019
Documentary letters of credit	114,296	169,320
Stand-by letters of credit and guarantees - commercial risk	247,912	255,481
Credit commitments	63,857	68,571
Total loans commitments and financial guarantee contracts	<u>426,065</u>	<u>493,372</u>

The remaining maturity profile of the Bank's outstanding loan commitments and financial guarantee contracts is as follows:

	June 30, 2020	December 31, 2019
Maturities		
Up to 1 year	396,508	424,744
From 1 to 2 years	19,557	8,628
From 2 to 5 years	10,000	60,000
Total	<u>426,065</u>	<u>493,372</u>

12. Gain (loss) on financial instruments, net

The following table sets forth the details for the gain or loss on financial instrument recognized in the consolidated statements of profit or loss:

	For the three months ended June 30,	
	2020	2019
Loss on derivative financial instruments and foreign currency exchange, net	(694)	13
Unrealized loss on financial instruments at fair value through profit or loss	(2,827)	25
Realized gain on financial instruments at fair value through profit or loss	(428)	(29)
Gain (loss) on sale of securities at fair value through OCI	-	54
	(3,949)	63

	For the six months ended June 30,	
	2020	2019
Loss on derivative financial instruments and foreign currency exchange, net	(1,885)	283
Unrealized loss on financial instruments at fair value through profit or loss	(2,827)	(11)
Realized gain on financial instruments at fair value through profit or loss	405	384
Gain (loss) on sale of securities at fair value through OCI	-	163
	(4,307)	819

13. Derivative financial instruments

The following table details quantitative information on the notional amounts and carrying amounts of the derivative instruments used for hedging by type of risk hedged and type of hedge:

	Nominal amount	June 30, 2020	
		Carrying amount of hedging instruments	
		Asset ⁽¹⁾	Liability ⁽²⁾
Interest rate risk			
Fair value hedges	122,000	1,343	(378)
Cash flow hedges	60,000	-	(2,167)
Interest rate and foreign exchange risk			
Fair value hedges	362,794	2,044	(38,654)
Cash flow hedges	257,626	1,984	(10,943)
Foreign exchange risk			
Cash flow hedges	55,563	3,244	(51)
	857,983	8,615	(52,193)
	Nominal amount	December 31, 2019	
		Carrying amount of hedging instruments	
		Asset ⁽¹⁾	Liability ⁽²⁾
Interest rate risk			
Fair value hedges	398,333	407	(805)
Cash flow hedges	123,000	-	(1,098)
Interest rate and foreign exchange risk			
Fair value hedges	346,844	10,125	(8,527)
Cash flow hedges	23,025	-	(1,670)
Foreign exchange risk			
Cash flow hedges	72,391	625	(2,552)
Net investment hedges	2,080	-	(23)
	965,673	11,157	(14,675)

⁽¹⁾ Included in the condensed consolidated interim statement of financial position under the line Derivative financial instruments - assets.

⁽²⁾ Included in the condensed consolidated interim statement of financial position under the line Derivative financial instruments - liabilities.

13. Derivative financial instruments (continued)

As part of the financial risk management, the Bank uses the following hedging relationships:

- Fair value hedge
- Cash flow hedge
- Net investment hedge

For control purposes, derivative instruments are recorded at their nominal amount in memoranda accounts. Interest rate swaps are made either in a single currency or cross currency for a prescribed period to exchange a series of interest rate flows, which involve fixed for floating interest payments, and vice versa. The Bank also engages in certain foreign exchange forward contracts to serve customers' transaction needs and to manage foreign currency risk. All such positions are hedged with an offsetting contract for the same currency.

The Bank manages and controls the risks on these foreign exchange trades by establishing counterparty credit limits by customer and by adopting policies that do not allow for open positions in the loan and investment portfolio. The Bank also uses foreign exchange forward contracts to hedge the foreign exchange risk associated with the Bank's equity investment in a non-U.S. dollar functional currency foreign entity. Derivative and foreign exchange forward instruments negotiated by the Bank are executed mainly over-the-counter (OTC). These contracts are executed between two counterparties that negotiate specific agreement terms, including notional amount, exercise price and maturity.

13. Derivative financial instruments (continued)

A. Fair value hedge

This type of hedge is used to mitigate the risk of changes in foreign exchange currency rates, as well as changes in interest rate risk. Within the derivative financial instruments used by the Bank for fair value hedging are interest rate swap contracts whereby a series of interest rate flows in a single currency are exchanged over a prescribed period and cross currency swaps contracts that generally involve the exchange of both interest and principal amounts in two different currencies.

The Bank's exposure to interest rate risk is disclosed in Note 5(C)(i). Interest rate risk to which the Bank applies hedge accounting arises from fixed-rate euro medium term notes and other long-term notes issuances ("Certificados Bursatiles"), fixed-rate loans and advances, whose fair value fluctuates when benchmark interest rates change. The Bank hedges interest rate risk only to the extent of benchmark interest rates because the changes in fair value of a fixed-rate note or loan are significantly influenced by changes in the benchmark interest rate. Hedge accounting is applied where economic hedging relationships meet the hedge accounting criteria.

Before fair value hedge accounting is applied by the Bank, the Bank determines whether an economic relationship between the hedged item and the hedging instrument exists based on an assessment of the qualitative characteristics of these items and the hedged risk that is supported by quantitative analysis. The Bank considers whether the critical terms of the hedged item and hedging instrument closely align when assessing the presence of an economic relationship. The Bank assesses whether the fair value of the hedged item and the hedging instrument respond similarly to similar risks. The Bank further supports this qualitative assessment by using regression analysis to assess whether the hedging instrument is expected to be and has been highly effective in offsetting changes in the fair value of the hedged item. The sources of ineffectiveness mainly come from forward rates, discount rates and cross currency basis (cost of the operation).

The following table details the notional amounts and carrying amounts of derivative instruments used in fair value hedges by type of risk and hedged item, along with the changes during the period used to determine and recognize the ineffectiveness of the hedge:

	June 30, 2020				
	Nominal amount	Carrying amount of hedging instruments		Changes in fair value used to calculate hedge ineffectiveness ⁽³⁾	Ineffectiveness recognized in profit or loss ⁽³⁾
		Asset ⁽¹⁾	Liability ⁽²⁾		
Interest rate risk					
Loans	12,000	-	(242)	(59)	3
Securities at FVOCI	5,000	-	(136)	(72)	(8)

1 to 2 years	48,333	-	48,333
2 to 5 years	-	346,844	346,844
Total	398,333	346,844	745,177

B. Cash flow hedge

This type of hedge is used to mitigate the risk of changes in foreign exchange currency rates, as well as changes in interest rate risk, that could include variability in the future cash flows. Within the derivative financial instruments used by the Bank for a cash flow hedging are interest rate swaps contracts whereby a series of interest rate flows in a single currency are exchanged over a prescribed period, cross currency swaps contracts that generally involve the exchange of both interest and principal amounts in two different currencies, and foreign exchange forward contracts, an agreement to purchase or sell foreign currency at a future date at agreed-upon terms.

The Bank's exposure to market risk is disclosed in Note 5 (C) (ii). The Bank determines the amount of the exposure to which it applies hedge accounting by assessing the potential impact of changes in interest rates and foreign currency exchange rates on the future cash flows. This assessment is performed using analytical techniques, such as cash flow sensitivity analysis. As noted above for fair value hedges, by using derivative financial instruments to hedge exposures to changes in interest rates and foreign currency exchange rates, the Bank exposes itself to credit risk of the counterparties to the derivatives, which is not offset by the hedged items. This exposure is managed similarly to that off fair value hedges.

The Bank determines whether an economic relationship exists between the cash flows of the hedged item and hedging instrument based on an assessment of the qualitative characteristics of these items and the hedged risk that is supported by quantitative analysis. The Bank considers whether the critical terms of the hedged item and hedging instrument closely align when assessing the presence of an economic relationship. The Bank assesses whether the cash flows of the hedged item and the hedging instrument respond similarly to the hedged risk, such as the benchmark interest rate or foreign currency. The Bank further supports this qualitative assessment by using sensitivity analysis to assess whether the hedging instrument is expected to be and has been highly effective in offsetting changes in the present value of the hedged item. The Bank assesses hedge effectiveness using the hypothetical derivative method, which creates a derivative instrument to serve as a proxy for the hedged transaction. The terms of the hypothetical derivative match the critical terms of the hedged item and it has a fair value of zero at inception. The sources of ineffectiveness arise mainly because of the differences in discount rates (OIS - Overnight Index Swap).

The maximum length of time over which the Bank has hedged its exposure to the variability in future cash flows on forecasted transactions is 4.98 years.

The Bank recognized the lifetime associated cost of the foreign exchange forward contracts into interest income, in profit or loss, as an adjustment to the yield on hedged items creating an accumulated reserve in OCI, reclassified to profit or loss at their maturity. The Bank estimates that approximately \$197 thousand are expected to be reclassified into profit or loss during the year ending June 30, 2021.

13. Derivative financial instruments (continued)

B. Cash flow hedge (continued)

The following table details the notional amounts and carrying amounts of derivative instruments used in cash flow hedges by type of risk and hedged item, along with the changes during the period used to determine and recognize the ineffectiveness of the hedge:

C. Net investment hedge

A foreign currency exposure arises from a net investment either in a subsidiary that has a different functional currency from that of the Bank or in a financial instrument in a foreign currency designated at FVOCI. The hedge risk in the net investment hedge is the variability in the US dollar against any other foreign currency that will result in a reduction in the carrying amount.

The Bank's policy is to hedge the net investment only to the extent of the debt principal; therefore, the hedge ratio is established by aligning the principal amount in foreign currency of the debt with the carrying amount of the net investment that is designated.

When the hedging instrument is a forward foreign exchange contract, the Bank establishes a hedge relationship where the notional of the forward foreign exchange contract matches the carrying amount of the designated net investment. The Bank ensures that the foreign currency in which the hedging instrument is denominated is the same as the functional currency of the net investment. The only source of ineffectiveness that is expected to arise from these hedging relationships is due to the effect of the counterparty and the Bank's own credit risk on the fair value of the derivative.

The following table details the notional amount and carrying amount of the derivative instruments used as net investment hedge by type of risk and hedged item, along with changes during the period used to determine and recognize the ineffectiveness of the hedge:

14. Other assets

Following is a summary of other assets:

	June 30, 2020	December 31, 2019
Pension fund	1,893	1,863
Accounts receivable	1,297	3,549
IT projects under development	1,227	521
Prepaid expenses	1,442	1,070
Interest receivable - deposits	36	26
Other	1,817	1,828
	<u>7,712</u>	<u>8,857</u>

15. Deposits

The maturity profile of the Bank's deposits, excluding interest payable, is as follows:

	June 30, 2020	December 31, 2019
Demand	281,685	85,786
Up to 1 month	1,175,278	1,285,949
From 1 month to 3 months	577,789	628,981
From 3 months to 6 months	633,243	593,431
From 6 months to 1 year	218,220	289,189
From 1 year to 2 years	-	5,000
	<u>2,886,215</u>	<u>2,888,336</u>

The following table presents additional information regarding the Bank's deposits

	June 30, 2020	December 31, 2019
Aggregate amounts of \$100,000 or more	2,886,055	2,888,043
Aggregate amounts of deposits in the New York Agency	<u>399,807</u>	<u>240,003</u>
	Three months ended June 30	
	2020	2019
Interest expense on deposits made in the New York Agency	<u>1,254</u>	<u>1,732</u>
	Six months ended June 30	
	2020	2019
Interest expense on deposits made in the New York Agency	<u>2,818</u>	<u>3,464</u>

16. Securities sold under repurchase agreements

As of June 30, 2020, and December 31, 2019, the Bank has financing transactions under repurchase agreements for \$10.4 million and \$40.5 million, respectively.

During the period ended June 30, 2020 and December 31, 2019, interest expense related to financing transactions under repurchase agreements totaled \$ 354 thousand and \$509 thousand, respectively. These expenses are included as interest expense – borrowings and debt line in the consolidated statement of profit or loss.

17. Borrowings and debt

Borrowings consist of bilateral funding and syndicated loans obtained from international banks. Debt instruments consist of public and private issuances under the Bank's Euro Medium Term Notes Program ("EMTN") as well as public issuances in the Mexican and Japanese markets.

The Bank's funding activities include: (i) EMTN, which may be used to issue notes for up to \$2.250 million, with maturities from 7 days up to a maximum of 30 years, at fixed or floating interest rates, or at discount, and in various currencies. The notes are generally issued in bearer or registered form through one or more authorized financial institutions; (ii) Short-and Long-Term Notes ("Certificados Bursátiles") Program (the "Mexican Program") in the Mexican local market, registered with the Mexican National Registry of Securities administered by the National Banking and Securities Commission in Mexico ("CNBV", for its acronym in Spanish), for an authorized aggregate principal amount of 10 billion Mexican pesos with maturities from 1 day to 30 years.

Some borrowing agreements include various events of default and covenants related to minimum capital adequacy ratios, incurrence of additional liens, and asset sales, as well as other customary covenants, representations and warranties. As of June 30, 2020, the Bank was in compliance with all those covenants.

Borrowings and debt are detailed as follows:

	June 30, 2020			December 31, 2019			Total
	Short-term		Lease liabilities	Long-term		Lease liabilities	
Carrying amount	Borrowings	Debt		Borrowings	Debt		
Principal	1,254,201	5,000	1,188	728,297	624,615	18,174	2,631,475
Prepaid commissions	-	-	-	(1,629)	(2,630)	-	(4,259)
	<u>1,254,201</u>	<u>5,000</u>	<u>1,188</u>	<u>726,668</u>	<u>621,985</u>	<u>18,174</u>	<u>2,627,216</u>

	December 31, 2019			December 31, 2019			Total
	Short-term		Lease liabilities	Long-term		Lease liabilities	
Carrying amount	Borrowings	Debt		Borrowings	Debt		
Principal	1,573,663	22,000	1,145	723,419	802,676	18,769	3,141,672
Prepaid commissions	-	-	-	(1,456)	(1,906)	-	(3,362)
	<u>1,573,663</u>	<u>22,000</u>	<u>1,145</u>	<u>721,963</u>	<u>800,770</u>	<u>18,769</u>	<u>3,138,310</u>

17. Borrowings and debt (continued)

Short-term borrowings and debt

The breakdown of short-term (original maturity of less than one year) borrowings and debt, along with contractual interest rates, is as follows:

	June 30, 2020	December 31, 2019
Short-term borrowings:		
At fixed interest rates	541,022	607,500
At floating interest rates	713,179	966,163
Total borrowings	1,254,201	1,573,663
Short-term debt:		
At fixed interest rates	5,000	22,000
Total debt	5,000	22,000
Total short-term borrowings and debt	1,259,201	1,595,663
Maximum balance at any month-end	1,830,338	1,595,663
Range of fixed interest rates on borrowings and debt in U.S. dollars	1.14% to 3.37%	2.07% to 2.52%
Range of floating interest rates on borrowings in U.S. dollars	0.51% to 2.18%	2.09% to 2.35%
Range of fixed interest rates on borrowings in Mexican pesos	-	8.08%
Range of floating interest rates on borrowings in Mexican pesos	5.96% to 7.35%	7.71% to 8.31%
Range of fixed interest rates on borrowings in Euros	1.00%	-

The outstanding balances of short-term borrowings and debt by currency, are as follows:

	June 30, 2020	December 31, 2019
Currency		
US dollar	1,149,668	1,476,000
Mexican peso	58,973	119,663
Euro	50,560	-
Total	1,259,201	1,595,663

17. Borrowings and debt (continued)

Long-term borrowings and debt

The breakdown of borrowings and long-term debt (original maturity of more than one year), along with contractual interest rates, plus prepaid commissions as of June 30, 2020 and December 31, 2019, respectively, are as follows (excludes lease liabilities):

	June 30, 2020	December 31, 2019
Long-term borrowings:		
At fixed interest rates with due dates from June 2020 to February 2022	71,376	65,435
At floating interest rates with due dates from June 2021 to August 2023	656,921	657,984
Total long-term borrowings	728,297	723,419
Long-term debt:		
At fixed interest rates with due dates from October 2020 to May 2025	332,201	502,880
At floating interest rates with due dates from March 2022 to June 2023	292,414	299,796
Total long-term debt	624,615	802,676
Total long-term borrowings and debt	1,352,912	1,526,095
Less: Prepaid commissions	(4,259)	(3,362)
Total long-term borrowings and debt, net	1,348,653	1,522,733
Maximum outstanding balance at any month – end	1,525,103	1,527,126
Range of fixed interest rates on borrowings and debt in U.S. dollars	2.04% to 3.05%	2.56% to 3.25%
Range of floating interest rates on borrowings and debt in U.S. dollars	0.93% to 2.23%	2.46% to 3.36%
Range of fixed interest rates on borrowings in Mexican pesos	5.95% to 9.09%	5.73% to 9.09%
Range of floating interest rates on borrowings and debt in Mexican pesos	6.04% to 7.74%	8.14% to 9.13%
Range of fixed interest rates on debt in Japanese yens	0.52%	0.52%
Range of fixed interest rates on debt in Euros	3.75%	3.75%
Range of fixed interest rates on debt in Australian dollars	3.33%	3.33%

The balances of long-term borrowings and debt by currency, excluding prepaid commissions, are as follows:

	June 30, 2020	December 31, 2019
Currency		
US dollar	758,523	1,097,611
Mexican peso	445,863	280,105
Japanese yen	68,376	67,831
Euro	59,457	59,465
Australian dollar	20,693	21,083
Total	1,352,912	1,526,095

17. Borrowings and debt (continued)

Long-term borrowings and debt (continued)

Future payments of long-term borrowings and debt outstanding as of Junio 30, 2020, are as follows:

	Payments	Outstanding
	2020	24,675
	2021	529,707
	2022	458,149
	2023	102,299
	2024	59,457
	2025	178,625
		1,352,912

Reconciliation – Movements of borrowings

The following table present the reconciliation of movements of borrowings and debt arising from financing activities, as presented in the consolidated statements of cash flows:

	2020	2019
Balance as of January 1,	3,138,310	3,518,446
Net increase (decrease) in short-term borrowings and debt	(325,742)	(897,407)
Proceeds from long-term borrowings and debt	149,799	83,636
Repayments of long-term borrowings and debt	(265,343)	(334,885)
Payment of lease liabilities	(530)	(512)
Recognition of lease liabilities	-	20,734
Net increase (decrease) of lease liabilities	27	-
Change in foreign currency	(70,286)	8,719
Adjustment of fair value for hedge accounting relationship	787	5,182
Other adjustments	194	1,238
Balance as of June 30,	2,627,216	2,405,151

17. Borrowings and debt (continued)

Lease liabilities

Maturity analysis of contractual undiscounted cash flows of the lease liability is detailed below:

	June 30, 2020	December 31, 2019
Due within 1 year	2,046	2,005
After 1 year but within 5 years	10,583	10,470
After 5 years but within 10 years	12,412	13,492
Total undiscounted lease liabilities	<u>25,041</u>	<u>25,967</u>
Short-term	1,188	1,145
Long-term	18,174	18,769
Lease liabilities included in the consolidated statement of financial position	<u>19,362</u>	<u>19,914</u>

Amounts recognized in the statement of cash flows

	June 30, 2020	December 31, 2019
Cash outflow for leases	<u>530</u>	<u>1,072</u>

Amounts recognized in profit or loss

	June 30, 2020	June 30, 2019
Interest on lease liabilities	<u>437</u>	<u>(482)</u>
Income from sub-leasing right-of-use assets	<u>121</u>	<u>150</u>

18. Other liabilities

Following is a summary of other liabilities:

	June 30, 2020	December 31, 2019
Accruals and other accumulated expenses	7,779	11,901
Accounts payable	3,344	2,526
Others	2,560	2,722
	<u>13,683</u>	<u>17,149</u>

19. Earnings per share

The following table presents a reconciliation of profit and share data used in the basic and diluted earnings per share ("EPS") computations for the dates indicated:

	Three months ended June 30	
	2020	2019
<i>(Thousands of U.S. dollars)</i>		
Profit for the period	14,106	22,272
<i>(U.S. dollars)</i>		
Basic earnings per share	0.36	0.56
Diluted earnings per share	0.36	0.42
<i>(Thousands of shares)</i>		
Weighted average of common shares outstanding applicable to basic EPS	39,654	39,553
Effect of diluted securities:		
Stock options and restricted stock units plan	-	-
Adjusted weighted average of common shares outstanding applicable to diluted EPS	<u>39,654</u>	<u>39,553</u>
	For the six months ended June 30	
	2020	2019
<i>(Thousands of U.S. dollars)</i>		
Profit for the period	32,408	43,517
<i>(U.S. dollars)</i>		
Basic earnings per share	0.82	1.10
Diluted earnings per share	0.82	1.10
<i>(Thousands of shares)</i>		
Weighted average of common shares outstanding applicable to basic EPS	39,632	39,548
Effect of diluted securities:		
Stock options and restricted stock units plan	-	-
Adjusted weighted average of common shares outstanding applicable to diluted EPS	<u>39,632</u>	<u>39,548</u>

20. Fee and commission income

Fee and commission income from contracts with customers broken down by main types of services according to the scope of IFRS 15, are detailed as follows:

Three months ended June 30, 2020

20. Fee and commission income (continued)

The following table provides information on the ordinary income that is expected to be recognized on the contracts in force:

	Up to 1 year	1 to 2 years	More than 2 years	Total
Ordinary income expected to be recognized on the contracts as of June 30, 2020	1,463	84	858	2,405
	Up to 1 year	1 to 2 years	More than 2 years	Total
Ordinary income expected to be recognized on the contracts as of June 30, 2019	1,527	377	580	2,484

21. Business segment information

The Bank's activities are managed and executed in two business segments: Commercial and Treasury. Information related to each reportable segment is set out below. Business segment results are based on the Bank's managerial accounting process, which assigns assets, liabilities, revenue and expense items to each business segment on a systematic basis. The maximum decision-making operating authority of the Bank is represented by the Chief Executive Officer and the Executive Committee, who review the internal management reports for each division at least every six months. Segment profit, as included in the internal management reports is used to measure performance as management believes that this information is the most relevant in evaluating the results of the respective segments relative to other entities that operate within the same industry.

The Bank's net interest income represents the main driver of profits; therefore, the Bank presents its interest-earning assets by business segment, to give an indication of the size of business generating net interest income. Interest-earning assets also generate gains and losses on sales, mainly from financial instruments at fair value through OCI and financial instruments at fair value through profit or loss, which are included in net other income. The Bank also discloses its other assets and contingencies by business segment, to give an indication of the size of business that generates net fees and commissions, also included in net other income.

The Commercial Business Segment encompasses the Bank's core business of financial intermediation and fee generating activities developed to cater to corporations, financial institutions and investors in Latin America. These activities include the origination of bilateral short-term and medium-term loans, structured and syndicated credits, loan commitments, and financial guarantee contracts such as issued and confirmed letters of credit, stand-by letters of credit, guarantees covering commercial risk, and other assets consisting of customers' liabilities under acceptances.

Profits from the Commercial Business Segment include (i) net interest income from loans; (ii) fees and commissions from the issuance, confirmation and negotiation of letters of credit, guarantees and loan commitments, and through loan structuring and syndication activities; (iii) gain on sale of loans generated through loan intermediation activities, such as sales in the secondary market and distribution in the primary market; (iv) gain (loss) on sale on financial instruments measured at FVTPL; (v) reversal (provision) for credit losses, (vi) gain (loss) in other non-financial assets, net; and (vii) direct and allocated operating expenses.

21. Business segment information (continued)

The Treasury Business Segment focuses on managing the Bank's investment portfolio, and the overall structure of its assets and liabilities to achieve more efficient funding and liquidity positions for the Bank, mitigating the traditional financial risks associated with the balance sheet, such as interest rate, liquidity, price and currency risks. Interest-earning assets managed by the Treasury Business Segment include liquidity positions in cash and cash equivalents, and financial instruments related to the investment management activities, consisting of securities at FVOCI and securities at amortized cost. The Treasury Business Segment also manages the Bank's interest-bearing liabilities, which constitute its funding sources, mainly deposits, short- and long-term borrowings and debt.

Profits from the Treasury Business Segment include net interest income derived from the above mentioned treasury assets and liabilities, and related net other income (net results from derivative financial instruments and foreign currency exchange, gain (loss) on financial instruments at FVTPL, gain (loss) on sale of securities at FVOCI, and other income), recovery or impairment loss on financial instruments, and direct and allocated operating expenses.

The following table provides certain information regarding the Bank's operations by segment:

	Three months ended June 30, 2020		
	Commercial	Treasury	Total

Other liabilities - unallocated	13,683	12,695
Total Liabilities	5,605,366	5,573,039

The Bank applied IFRS 16, as of January 1, 2019, using the modified retrospective approach to recognize right-of-use assets for \$17.4 million presented within equipment and leasehold improvements and lease liabilities for \$20.9 million. As of June 30, 2020, assets and liabilities were allocated between Commercial and Treasury segments.

As a result of the adoption of the new standard in the period 2019, certain amounts related to equipment and leasehold improvements and intangibles were reclassified for presentation purposes in the consolidated financial statement.

(1) This caption includes the financial cost relating to leases and depreciation expense for the right-of-use assets that rises from the lease contract with related parties where the Bank acts as a lessee through June 30, 2019.

22. Related party transactions (continued)

The total compensation paid to directors and the executives as representatives of the Bank amounted to:

	Six months ended June 30	
	2020	2019
<u>Expenses:</u>		
Compensation costs to directors	798	245
Compensation costs to executives	4,191	2,298
	Three months ended June 30	
	2020	2019
<u>Expenses:</u>		
Compensation costs to directors	450	211
Compensation costs to executives	781	556

Compensation costs to directors and executives, include annual cash retainers and the cost of granted restricted stock and restricted stock units.

23. Litigation

Bladex is not engaged in any litigation that is significant to the Bank's business or, to the best of the knowledge of Bank's management, that is likely to have an adverse effect on its business, consolidated financial position or its consolidated financial performance.

24. Applicable laws and regulations

Liquidity index

Rule No. 2-2018 issued by the Superintendence of Banks of Panama (SBP) establishes that every general license or international license bank must guarantee, with a higher level of confidence, that it is in the position to face its intraday liquidity obligations in a period when liquidity pressure may affect the lending market. For that purpose, the Superintendence of Banks of Panama has established a short-term liquidity coverage ratio known as "Liquidity Coverage Ratio or LCR". This ratio is measured through the quotient of two amounts, the first one corresponds to the high-quality liquid assets and the second one corresponds to the net cash outflows in 30 days.

As of June 30, 2020 and December 31, 2019, the minimum LCR to be reported to the SBP was 50% and 25%, respectively. The Bank's LCR as of June 30, 2020 and December 31, 2019 was 179.98% and 131%, respectively.

Rule No. 4-2008 issued by the SBP establishes that every general license or international license bank must maintain, always, a minimum balance of liquid assets equivalent to 30% of the gross total of its deposits in the Republic of Panama or overseas up to 186 days, counted from the reporting date. The formula is based on the following parameters:

$$\frac{\text{Liquid assets}}{\text{Liabilities (Deposits Received)}} \times 100 = X\% \text{ (Liquidity ratio)}$$

As of June 30, 2020, and December 31, 2019, the percentage of the liquidity index reported by the Bank to the regulator was 107.64% and 100.36%, respectively.

Capital adequacy

The Banking Law in the Republic of Panama and the Rules No. 01-2015 and 03-2016 require that the general license banks maintain a total capital adequacy index that shall not be lower, at any time, than 8% of total assets and off-balance sheet irrevocable contingency transactions, weighted according to their risks; and ordinary primary capital that shall not be less than 4.5% of its assets and off-balance sheet transactions that represent an irrevocable contingency, weighted based on their risks; and a primary capital that shall not be less than 6% of its assets and off-balance sheet transactions that represent an irrevocable contingency, weighted based on their risks.

The primary objectives of the Bank's capital management policy are to ensure that the Bank complies with capital requirements imposed by local regulator and maintains strong credit ratings and healthy capital ratios to support its business and to maximize shareholder value.

The Bank manages its capital structure and adjusts it according to changes in economic conditions and the risk characteristics of its activities. To maintain or adjust the capital structure, the Bank may adjust the amount of dividend payment to shareholders, return capital to shareholders or issue capital securities. No changes have been made to the objectives, policies and processes from the previous periods. However, they are under constant review by the Board.

	June 30, 2020	December 31, 2019
Tier 1 capital	1,034,371	1,026,125
Risk weighted assets	4,683,626	5,937,648
Tier 1 capital ratio	22.08%	17.28%

24. Applicable laws and regulations (continued)

Leverage ratio

Article No. 17 of the Rule No. 1-2015 establishes the leverage ratio of a regulated entity by means of the quotient between the ordinary primary capital and the total exposure for non-risk-weighted assets inside and outside the statement of financial position established by the SBP. For the determination of the exposure of off-balance-sheet operations, the criteria established for credit and counterparty credit risk positions will be used. The exposure of the derivatives will be the fair value at which it is recorded in the entity's assets.

The leverage ratio cannot be lower, at any time, than 3%. The Bank will inform to SBP as often as the compliance with the leverage ratio is determined.

	June 30, 2020	December 31, 2019
Ordinary capital	898,352	890,106
Non-risk-weighted assets	6,831,786	7,323,187
Leverage ratio	13.15%	12.15%

Specific credit provisions

Rule No. 4-2013, modified by Rule No. 8-2014, states that the specific provisions are originated from the objective and concrete evidence of impairment. These provisions must be established for credit facilities classified according to the risk categories denominated as: special mention, substandard, doubtful, or unrecoverable, both for individual credit facilities as for a group of such facilities. In the case of a group, it corresponds to circumstances that indicate the existence of deterioration in credit quality, although individual identification is still not possible.

Banks must calculate and maintain at all times the amount of the specific provisions determined by the methodology specified in this Rule, which takes into account the balance owed of each credit facility classified in any of the categories subject to provision, mentioned in the paragraph above; the present value of each guarantee available in order to mitigate risk, as established by type of collateral; and a weighting table that applies to the net exposure balance subject to loss of such credit facilities.

Article No. 34 of this Rule establishes that all credits must be classified in the following five (5) categories, according to their default risk and loan conditions, and establishes a minimum reserve for each classification: normal 0%, special mention 20%, substandard 50%, doubtful 80%, and unrecoverable 100%.

If there is an excess in the specific provision, calculated in accordance with this Rule, compared to the provision calculated in accordance with IFRS, this excess will be accounted for as a regulatory credit reserve in equity and will increase or decrease with appropriations from/to retained earnings. The balance of the regulatory credit reserve will not be considered as capital funds for calculating certain ratios or prudential indicators mentioned in the Rule.

In March 2020, Rule No. 2-2020 was issued as a modification to Rule No. 4-2013, creating a new form of credits, called "modified credits", in which it allows the debtor to properly attend to its obligation in the event of potential or actual deterioration related to its possibility of payment, in the face of the crisis caused by COVID-19. As of June 30, 2020, the Bank has modified three credits under this new category for the total value of \$ 21.2 million.

24. Applicable laws and regulations (continued)

Based on the classification of risks, collateral and in compliance with SBP Rule No. 4-2013, the Bank classified the loan portfolio as follows:

June 30, 2020						
Loans	Normal	Special Mention	Substandard	Doubtful	Unrecoverable	Total
Corporations	2,043,848	38,261	-	-	-	2,082,109
Banks:						
Private	2,061,131	-	-	-	-	2,061,131
State-owned	300,995	-	-	-	-	300,995
	2,362,126	-	-	-	-	2,362,126
Sovereign	41,318	-	-	-	-	41,318
Total	4,447,292	38,261	-	-	-	4,485,553
Allowance for loan losses IFRS (*):	38,049	7,385	-	-	-	45,434

December 31, 2019						
Loans	Normal	Special Mention	Substandard	Doubtful	Unrecoverable	Total
Corporations	2,487,859	13,595	-	-	61,845	2,563,299
Banks:						
Private	2,692,787	-	-	-	-	2,692,787
State-owned	589,690	-	-	-	-	589,690
	3,282,477	-	-	-	-	3,282,477
Sovereign	47,221	-	-	-	-	47,221
Total	5,817,557	13,595	-	-	61,845	5,892,997
Allowance for loan losses IFRS (*):	42,396	2,338	-	-	54,573	99,307

As of June 30, 2020 and December 31, 2019, there are no restructured loans.

(*) As of June 30, 2020, and December 31, 2019, there is no excess in the specific provision calculated in accordance with Agreement No. 8-2014 of the SBP, over the provision calculated in accordance with IFRS.

24. Applicable laws and regulations (continued)

For statutory purposes only, non-accruing loans are presented by category as follows:

Non-accruing loans	June 30, 2020					Total
	Normal	Special Mention	Substandard	Doubtful	Unrecoverable	
Impaired loans	-	-	-	-	-	-
Total	-	-	-	-	-	-

Non-accruing loans	December 31, 2019					Total
	Normal	Special Mention	Substandard	Doubtful	Unrecoverable	
Impaired loans	-	-	-	-	61,845	61,845
Total	-	-	-	-	61,845	61,845

Credit risk coverage - dynamic provision

	June 30, 2020	December 31, 2019
Non-accruing loans:		
Private corporations	-	61,845
Total non-accruing loans	-	61,845
Interest that would be reversed if the loans had been classified as non-accruing loans	-	1,379
Income from collected interest on non-accruing loans	-	631

The SBP by means of Rule No. 4-2013, establishes the compulsory constitution of a dynamic provision in addition to the specific credit provision as part of the total provisions for the credit risk coverage.

The dynamic provision is an equity item associated to the regulatory capital but does not replace or offset the capital adequacy requirements established by the SBP.

Methodology for the constitution of the regulatory credit reserve

The Superintendence of Banks of Panama by means of the General Resolution of Board of Directors SBP-GJD-0003-2013 of July 9, 2013, establishes the accounting methodology for differences that arise between the application of the International Financial Reporting Standards (IFRS) and the application of prudential regulations issued by the SBP; as well as the additional disclosures required to be included in the notes to the consolidated financial statements.

24. Applicable laws and regulations (continued)

Methodology for the constitution of the regulatory credit reserve (continued)

The parameters established in this methodology are the following:

1. The calculations of accounting balances in accordance with IFRS and the prudential standards issued by the SBP will be carried out and the respective figures will be compared.
2. When the calculation made in accordance with IFRS results in a greater reserve or provision for the bank compared to the one resulting from the use of the prudential standards issued by the SBP, the Bank will account the IFRS figures.
3. When the impact of the use of prudential standards results in a greater reserve or provision for the Bank, the effect of the application of IFRS will be recognized in profit or loss, and the difference between IFRS calculation compared to the prudential standards calculation will be appropriated from retained earnings as a regulatory credit reserve. If the bank does not have sufficient retained earnings, the difference will be presented as an accumulated deficit account.
4. The regulatory credit reserve mentioned in paragraph 3 of this Rule may not be reversed against the retained earnings as long as there are differences between IFRS and the originated prudential regulations.

Considering that the Bank presents its consolidated financial statements under IFRS, specifically for its expected credit reserves under IFRS 9, the line "Regulatory credit reserve" established by the SBP has been used to present the difference between the application of the accounting standard used and the prudential regulations of the SBP to comply with the requirements of Rule No. 4-2013.

As of June 30, 2020, and December 31, 2019, the total amount of the dynamic provision and the regulatory credit reserve calculated according to the guidelines of Rule No. 4-2013 of the SBP is \$136.0 million for both periods, appropriated from retained earnings for purposes of compliance with local regulatory requirements. This appropriation is restricted from dividend distribution in order to comply with local regulations. The provision and reserve are detailed as follows:

	June 30, 2020	December 31, 2019
Dynamic provision	136,019	136,019
Regulatory credit reserve	-	-
	136,019	136,019

Capital reserve

In addition to capital reserves required by regulations, the Bank maintains a capital reserve of \$95.3 million, which was voluntarily established. Pursuant to Article No. 69 of the Banking Law, reduction of capital reserves requires prior approval of SBP.

25. Subsequent events

Bladex announced a quarterly cash dividend of \$0.25 US dollar cents per share corresponding to the second quarter of 2020. The cash dividend was approved by the Board of Directors at its meeting held on July 21, 2020 and it was payable on August 25, 2020 to the Bank's stockholders as of August 10, 2020 record date.
